

ISO 15620:2000-07 (E)

Welding_ - Friction welding of metallic materials

Contents

	Page
Foreword	v
Introduction	vi
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Welding knowledge	4
4.1 Process	4
4.2 Materials and material combinations	7
4.3 Friction welding machines	7
5 Quality requirements	9
5.1 General	9
5.2 Pre-welding conditions	9
5.3 Post-welding treatment	10
5.4 Quality assurance	10
6 Welding procedure specification (WPS)	11
6.1 General	11
6.2 Information related to the manufacturer	11
6.3 Information related to the material	11
6.4 Welding parameters	11
6.5 Joint	12
6.6 Optional devices	12
7 Welding procedure approval	12
7.1 Principles	12
7.2 Welding procedure tests	12
7.3 Welding procedure approval record (WPAR)	16
7.4 Previous experience	16
7.5 Circumstances mandating requalification	16
7.6 Machine-specific nature of a WPS	16
7.7 Requalification procedure requirements	16
8 Welding personnel	16
8.1 Friction welding machine operator	16
8.2 Friction welding machine setter	16
8.3 Welding coordination personnel (supervisor)	16
Annex A (informative) – Relationship of welding parameters	17
Annex B (informative) – Additional processes based on friction	19
Annex C (informative) – Material combinations weldable by friction welding	21
Annex D (informative) – Guidelines for quality assurance	22
Annex E (informative) – Examination and test	23
Annex F (informative) – Manufacturer's friction welding procedure specification (WPS)	25
Annex G (informative) – Characteristics of friction welded components	27
Annex H (informative) – Welding procedure approval record form (WPAR)	31
