DIN ISO 17927-1:2024-08 (E)

Welding for aerospace applications - Fusion welding of metallic components - Part 1: Process specification (ISO 17927-1:2020)

Contents

Page

National foreword 4

National Annex NA (informative) **Context and information on the continued operation of existing aircrafts and spacecrafts and their components using DIN 29595** 6

National Annex NB (informative) **Bibliography** 7

Foreword 9

1 Scope 10

2 Normative references 10

3 Terms and definitions 11

4 Conformance 12

5 Classification and inspection requirements of joints 12

6 Quality levels 13

7 Weldment design 13

8 Welding procedure specification (WPS) 13
8.1 General 13
8.2 WPS qualification/welding procedure qualification record (WPQR) 15

9 Fabrication 16
9.1 General 16
9.2 Identification and traceability of welding consumables 17
9.3 Storage and use 17
9.3.1 Filler material 17
9.3.2 Welding fluxes 17
9.3.3 Gases 17
9.4 Welding equipment 17
9.4.1 General 17
9.4.2 Calibration 17
9.5 Weld joint preparation 18
9.5.1 Pre-weld joint configuration 18
9.5.2 Butt joint members of unequal thickness 18
9.6 Pre-weld cleaning and other preparation 19
9.6.1 Surface cleaning 19
9.6.2 Protection and recleaning of cleaned surfaces before fit-up 19
9.7 Preheating and interpass temperature control 19
9.8 Tack welds 19
9.9 Run-on, run-off tabs and beam stopper 20
9.10 Weld shielding 20
9.11 Spatter protection 20
9.12 Filler materials 20
9.13 Interpass cleaning 21
9.14 Welding and weldments 21
9.14.1 General 21
9.14.2 Weld settings 21
9.14.3 Arc strike 21
9.14.4 In-process correction 21
9.14.5 Post-weld processing 22

9.15 Weld identification requirements 22
9.15.1 Weld traceability 22
9.15.2 Acceptance inspection 22
9.15.3 Acceptance criteria 23
9.16 Rework 23
9.16.1 General 23
9.16.2 Allowed number of rework attempts 23
9.16.3 Root area rework 23
9.16.4 Inspection of the rework 23
9.16.5 Documentation of rework 23
9.17 Repair 23
9.17.1 General 23
9.17.2 Repair instructions 23
9.18 Record requirements 24
9.19 Welding parameters 24
9.20 Reproducibility tests for qualified machine welding settings 24
9.20.1 Applicability of requirements 24
9.20.2 Test requirements 24

10 Personnel 24
10.1 Welding coordination personnel 24
10.2 Qualification of welders and welding operators 24
10.3 Qualification of inspection personnel 24
10.3.1 Qualification of non-destructive testing (NDT) personnel 24
10.3.2 Visual weld inspectors 25

11 Inspection methods 25
11.1 Visual weld inspection 25
11.2 Non-destructive testing 25
11.2.1 General 25
11.2.2 Penetrant testing (PT) 25
11.2.3 Magnetic particle testing (MT) 25
11.2.4 Radiographic testing (RT) 26
11.2.5 Ultrasonic testing (UT) 26
11.2.6 Other non-destructive test methods 26
11.3 Destructive testing 26
11.3.1 General 26
11.3.2 Tensile testing 26
11.3.3 Bend testing 26
11.3.4 Hardness testing 26
11.3.5 Metallographic examination 27

12 Requirements specific to TIG and plasma welding processes 27

Annex A (informative) **Welding procedure qualification record (WPQR) 28**

Annex B (informative) **Welding procedure specification (WPS) 30**

Annex C (informative) **Example for preheat and interpass temperature 33**

Bibliography 34
