ISO 17834:2003-12 (E)

Thermal spraying - Coatings for protection against corrosion and oxidation at elevated temperatures

Contents

Page

Foreword v

1 Scope 1

2 Normative references 1

3 Coating material and processes 2

4 Application of coating 3

5 Required characteristics 4
5.1 Coating thickness 4
5.2 Service temperature, environment and subsequent treatment 4

6 Re-treatment of defective areas 4

Annex A (informative) Design recommendations for objects to be metal sprayed 5

Annex B (normative) Coating materials 6

Annex ZZ (normative) Corresponding International and European Standards for which equivalents are not given in the text 7
