ISO/TR 17671-7:2004-06 (E)

Welding - Recommendations for welding of metallic materials - Part 7: Electron beam welding

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Quality requirements 7

5 Storage and handling of parent metals and consumables 7

6 Welding facilities 7

7 Qualification of the welding personnel 8

8 Welding procedure specification 8

9 Welding procedure test 9

10 Joint preparation 9
10.1 Machining 9
10.2 Demagnetisation 9
10.3 Cleaning 10
10.4 Assembly 10

11 Joint design 10
11.1 Longitudinal seams 10
11.2 Circular seams 11

12 Evacuation holes 12

13 Tack welds, cosmetic passes 13

14 Thermal pre- and post heat treatment 13

15 Documentation 13

Annex A (informative) Information about weldability of metallic materials 14

Annex B (informative) Summary of electron beam weldability of metals with reference to Annex C (informative) Information about causes of weld imperfections and prevention 25

Annex D (informative) Examples of preparation of circular joints 27

Bibliography 34
