Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	Physical environment and operating conditions .....	2
5	Classification of welding current meters with their current sensing coil, and designation of product .....	2
5.1	Classes of welding current meter with current sensing coil .....	2
5.2	Designation of product .....	3
6	Requirements for welding current meter with current sensing coil .....	3
6.1	Welding current meter .....	3
6.2	Current sensing coil .....	3
6.3	Welding current meter with its current sensing coil .....	4
6.4	Integrator .....	4
6.5	Data processing unit .....	4
6.6	Display unit and output ports .....	4
6.7	Minimum and maximum duration of welding current .....	4
6.8	Maximum measuring current .....	5
6.9	Minimum measuring current .....	5
6.10	Phase-controlled current .....	5
6.11	Minimum time for current measurement .....	5
6.12	Fluctuation of supply voltage .....	5
6.13	Mechanical strength of current sensing coil .....	5
6.14	Setting position error of current sensing coil .....	5
6.15	Influence of ambient temperature .....	5
6.16	Test .....	6
6.16.1	Type test .....	6
6.16.2	Acceptance test .....	6
7	Test procedures .....	6
7.1	Maximum measuring current .....	6
7.2	Minimum measuring current .....	6
7.3	Phase-controlled current .....	7
7.4	Minimum time for current measurement .....	7
7.5	Fluctuation of supply voltage .....	7
7.6	Thermal test .....	8
8	Marking .....	8
Annex A (normative)	Definition of indicated measuring time and its indicated current value .....	9
A.1	Indicated measuring time .....	9
A.2	Welding current value for the indicated measuring time .....	10
Annex B (informative)	Set-up of a current sensing coil and construction of welding current meters	11
