ISO 16433:2006-04 (E)

Resistance welding - Procedure for seam welding of uncoated and coated low carbon steels

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Materials 2
4.1 Form 2
4.2 Steel grades 2
4.3 Surface conditions 2

5 Component design and manufacture 3
5.1 Component design 3
5.2 Component manufacture 3

6 Process requirements 3
6.1 Seam welding with wide wheels 3
6.2 Seam welding with thin wheels 3
6.3 Mash seam welding 4
6.4 Wire seam welding 4
6.5 Wide-electrode seam welding 4
6.6 Foil seam welding 4

7 Welding equipment 5
7.1 Welding machine 5
7.2 Electrodes (wheels, mandrels, pads, backing bars) 5
7.2.1 Electrode materials 5
7.2.2 Electrode dimensions 5
7.3 Electrode-wheel cooling 7

8 Weldability assessment 7

9 Weld assessment -- Type tests 8
9.1 Test pieces 8
9.1.1 General 8
9.1.2 Manual peel test piece 8
9.1.3 Mechanised peel test piece 8
9.1.4 Pressure test 9
9.1.5 Metallurgical examination 9
9.2 Test requirements 9
9.2.1 Weld dimensions 9
9.2.2 Manual peel test 9
9.2.3 Mechanised peel test 9
9.2.4 Pressure test 9
9.2.5 Visual and metallurgical examination 9
9.3 Acceptance requirements 10

10 Weld assessment -- routine tests 10
10.1 General 10
10.2 Batch testing 10
10.3 Test pieces and test procedures 10
10.4 Number of tests 10
10.5 Test requirements 10

11 Routine production weld quality-control requirements 11
11.1 Weld size -- nugget width 11
11.2 Weld dimensions 11
11.3 Weld failure mode 12
11.4 Weld appearance - surface condition 12
11.5 Distortion 12

12 Reclamation of non-conformant assemblies 12

Annex A (informative) Welding equipment 13

Annex B (informative) Typical seam welding conditions 14

Annex C (Informative) Partial list of steel types applicable to the standard 19
