

# DIN EN 12198-3:2008-11 (E)

**Safety of machinery - Assessment and reduction of risks arising from radiation emitted by machinery - Part 3: Reduction of radiation by attenuation or screening (includes Amendment A1:2008)**

---

<b>Contents</b>	<b>Page</b>
Foreword .....	3
Introduction .....	4
1 Scope .....	4
2 Normative references .....	4
3 Terms and definitions .....	5
4 Classification of radiation .....	5
5 Procedure for reducing radiation emission levels by design .....	6
6 Strategy for design of shield .....	6
6.1 Design target .....	6
6.2 Characterization of all the radiation sources .....	7
6.3 Radiation fields, beam geometry access and enclosure .....	7
6.4 Review available of attenuating material .....	8
6.5 Assess of environmental conditions .....	9
6.6 Design requirements .....	9
6.7 Manufacture prototype .....	11
6.8 Determination of the effectiveness of the shielding .....	11
6.9 Compare with desired levels set in step 1 and if necessary, modify design .....	11
6.10 Prepare documentation for users .....	11
Annex ZA (informative) !!!!Relationship between this European Standard and the Essential Requirements of EU Directive 98/37/EC"" .....	12
Annex ZB (informative) !!!!Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC"" .....	13
