ISO/TR 14294:2011-11 (E)

Workplace atmospheres - Measurement of dermal exposure - Principles and methods

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Assessment of dermal exposure 5
4.1 General 5
4.2 Defining study objectives 6

5 Principles and methods 7
5.1 Measurements methods and sampling 7
5.2 Selection of sampling methods 9
5.3 Temporal and spatial variations of exposure 10

6 Quality issues 11
6.1 General 11
6.2 Sampling efficiency 11
6.3 Recovery efficiency 11
6.4 Background and contamination 11
6.5 Sample stability 12
6.6 Analytical method 12

7 Test report 12
7.1 Description of the measuring procedure 12
7.2 Core information 13

Annex A (informative) The conceptual model 14

Annex B (informative) Interception methods 16

Annex C (informative) Hand wash methods 21

Annex D (informative) Wipe methods 25

Annex E (informative) Tape-stripping method 29

Annex F (informative) In situ methods 34
