Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2
3.1 General definitions 2
3.2 Particle size fraction definitions 3
3.3 Sampling definitions 3
3.4 Analytical definitions 4
3.5 Statistical terms 6

4 Principle 7

5 Requirement 7

6 Reagents 8

7 Apparatus 9
7.1 Sampling equipment 9
7.2 Laboratory apparatus 10

8 Occupational exposure assessment 11
8.1 General 11
8.2 Personal sampling 11
8.3 Static sampling 12
8.4 Selection of measurement conditions and measurement pattern 12

9 Sampling 13
9.1 Preliminary considerations 13
9.2 Preparation for sampling 15
9.3 Sampling position 15
9.4 Collection of samples 16
9.5 Transportation 16

10 Analysis 16
10.1 Preparation of test and calibration solutions 17
10.2 Instrumental analysis 17
10.3 Estimation of detection and quantification limits 18
10.4 Quality control 19
10.5 Measurement uncertainty 20

11 Expression of results 21

12 Method performance 21
12.1 Sampling efficiency and sample storage 21

12.2 Quantification limit 21
12.3 Upper limits of the working range 21
12.4 Bias and precision 22
12.5 Uncertainty of sampling and analysis method 22
12.6 Interferences 22

13 Test report 22
13.1 Test record 22
13.2 Laboratory report 23

Annex A (informative) Temperature and pressure correction 24

Annex B (normative) Filter materials 25

Annex C (informative) Sampler wall deposits 26

ISO 17091:2013(E) Bibliography 27
