

# DIN EN 1127-2:2014-09 (E)

## Explosive atmospheres - Explosion prevention and protection - Part 2: Basic concepts and methodology for mining

---

<b>Contents</b>		<b>Page</b>
Foreword .....		4
Introduction .....		5
<b>1</b>	<b>Scope .....</b>	<b>8</b>
<b>2</b>	<b>Normative references .....</b>	<b>9</b>
<b>3</b>	<b>Terms and definitions .....</b>	<b>10</b>
<b>4</b>	<b>Risk assessment .....</b>	<b>11</b>
4.1	General .....	11
4.2	Identification of explosion hazards .....	11
4.3	Identification of ignition hazards .....	11
4.4	Estimation of the possible effects of an explosion .....	11
<b>5</b>	<b>Possible ignition sources .....</b>	<b>12</b>
5.1	Hot surfaces .....	12
5.2	Flames and hot gases (including hot particles) .....	12
5.3	Mechanically generated sparks .....	12
5.4	Electrical equipment .....	12
5.5	Stray electric currents .....	12
5.6	Static electricity .....	13
5.7	Lightning .....	13
5.8	Radio frequency (RF) electromagnetic waves from 104 Hz to $3 \times 10^{11}$ Hz (high frequency) .....	13
5.9	Electromagnetic waves from $3 \times 10^{11}$ Hz to $3 \times 10^{15}$ Hz .....	13
5.10	Ionizing radiation .....	13
5.11	Ultrasonics .....	13
5.12	Adiabatic compression and shock waves .....	13
5.13	Exothermic reactions, including self-ignition of dusts .....	13
<b>6</b>	<b>Risk reduction .....</b>	<b>14</b>
6.1	Fundamental principles .....	14
6.2	Avoidance or reduction of explosive atmosphere .....	14
6.2.1	Process parameters .....	14
6.2.2	Design and construction of equipment, protective systems and components containing flammable substances .....	16
6.3	Classification of hazardous atmospheric conditions .....	16
6.3.1	General .....	16
6.3.2	Hazardous atmospheric conditions .....	17
6.4	Requirements for the design and construction of equipment, protective systems and components by avoidance of effective ignition sources .....	17
6.4.1	General .....	17
6.4.2	Hot surfaces .....	18
6.4.3	Flames and hot gases .....	19
6.4.4	Mechanically generated sparks .....	19
6.4.5	Electrical equipment .....	20
6.4.6	Stray electric currents .....	20
6.4.7	Static electricity .....	20
6.4.8	Lightning .....	20

6.4.9	Radio frequency (RF) electromagnetic waves from 104 Hz to 3 × 10 <sup>11</sup> Hz .....	20
6.4.10	Electromagnetic waves from 3 × 10 <sup>11</sup> Hz to 3 × 10 <sup>15</sup> Hz .....	21
6.4.11	Ionizing radiation .....	22
6.4.12	Ultrasonics .....	22
6.4.13	Adiabatic compression and shock waves .....	22
6.4.14	Exothermic reactions, including self-ignition of dusts .....	22
6.5	Requirements for design and construction of equipment, protective systems and components to reduce the explosion effects .....	23
6.5.1	General .....	23
6.5.2	Special equipment for underground mining .....	23
6.6	Provisions for emergency measures .....	24
6.7	Principles for measuring and control systems for explosion prevention and protection ...	24
7	Information for use .....	24
7.1	General .....	24
7.2	Information for commissioning, maintenance and repair to prevent explosion .....	25
7.3	Qualifications and training .....	26
Annex A (informative) Relation between categories and hazardous atmospheric conditions .....		27
Annex B (normative) Tools for use in potentially explosive atmospheres .....		28
Annex C (informative) Significant technical changes between this document and the previous edition of this European Standard .....		29
Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 94/9/EC .....		30
Annex ZB (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 2006/42/EC .....		31
Bibliography .....		32
