European foreword 4

Introduction 5

1 44BScope 6

2 45BNormative references 6

3 46BTerms and definitions and abbreviations 6
3.1 51BTerms and definitions 6
3.2 52BAbbreviations 7

4 47BGeneral 7

5 48BOccupational exposure assessment 9
5.1 53BBasic characterization 9
5.1.1 58BGeneral 9
5.1.2 59BIdentification of chemical agents and other information required 9
5.1.3 60BReview of workplace factors 10
5.1.4 61BEstimation of exposure 10
5.1.5 62BDecisions 11
5.2 54BSampling strategy 11
5.2.1 63BConstitution of Similar Exposure Groups (SEGs) 11
5.2.2 64BSpecifying the measuring procedure 12
5.3 55BPerforming exposure measurements 13
5.4 56BValidation of results and SEGs 13
5.4.1 65BGeneral 13
5.4.2 66BValidation of measurement results 13
5.4.3 67BValidation of SEGs 14
5.5 57BComparison of results with OELVs 14
5.5.1 68BGeneral 14
5.5.2 69BPreliminary test 15
5.5.3 70BStatistical test 15

6 49BReport 16

7 50BPeriodic reassessment 16

Annex A 35B(informative) Assessment of exposure 18

A.1 0BGeneral 18
A.2 1BWorkplaces with constant conditions 20
A.3 2BShortened exposure at workplaces with constant working conditions 20
A.4 3BWorkplaces involving occasional exposure 20
A.5 4BStationary workplaces with irregular exposure 21
A.6 5BWorkers who move from a workplace to another with irregular exposure 21
A.7 6BWorkplaces with unpredictable, constantly changing exposure 22
A.8 7BOutdoor workplaces 22
A.9 8BUnderground workplaces 22

Annex B 36B(informative) Occupational exposure limit values for compliance testing 24

Annex C 37B(informative) Simultaneous ~occupationalTM exposure to several chemical agents 26

C.1 9BGeneral 26
C.2 10BTier 1: Exposure index (IE) 26
C.3 11BTier 2: Additive effect exposure index (IAE) 27
C.4 12BOther approaches 28

Annex D 38B(informative) Exposure profile and sampling duration 29

D.1 13BGeneral 29
D.2 14BMeasurement for testing compliance with 8 h- OELV 29
D.3 15BMeasurement for testing compliance with short-term limit value 34

Annex E 39B(informative) Check of exposure measurements distribution, and identification of exceptional exposure within the SEG 35

E.1 16BGeneral 35
E.2 17BGraphical method 35
E.2.1 27BPrinciple 35
E.2.2 28BPlotting 36
E.2.3 29BExample 36
E.2.4 30BExamples of SEGs requiring further consideration 37
E.2.4.1 31BGeneral 37
E.2.4.2 32BSEG consisting of two groups 38
E.2.4.3 33BSome individuals with exceptional exposure 39
E.2.4.4 34BDistributions appearing to be not lognormal 40
E.3 18BStatistical methods for the validation of SEGs 41

Annex F 40B(informative) Testing compliance with OELVs 42

F.1 19BGeneral 42
F.2 20BSEG compliance test for at least six exposure measurements 42
F.3 21BDecision 43

Annex G 41B(informative) Exposure calculation with a work shift longer than 8h 45

Annex H 42B(informative) Exposure below the limit of quantification 46

H.1 22BGeneral 46
H.2 23BPrinciple 46
H.3 24BExample 46
H.4 25BUncertainty 49
H.5 26BSoftware 50

Annex I 43B(informative) Interval for periodic measurements 51
