

DIN EN 1127-1:2019-10 (E)

Explosive atmospheres - Explosion prevention and protection - Part 1: Basic concepts and methodology

Contents

Page

European foreword.....	4
Introduction	5
1 Scope	6
2 Normative references.....	7
3 Terms and definitions	7
4 Risk assessment.....	8
4.1 General.....	8
4.2 Identification of explosion hazards	8
4.2.1 General.....	8
4.2.2 Flammability properties.....	9
4.2.3 Explosion behaviour	9
4.2.4 Likelihood of occurrence of a hazardous explosive atmosphere	9
4.3 Identification of ignition hazards.....	10
4.3.1 General.....	10
4.3.2 Ignition properties	11
4.3.3 Likelihood of occurrence of effective ignition sources.....	11
4.4 Estimation of the possible effects of an explosion	11
5 Possible ignition sources.....	12
5.1 Hot surfaces.....	12
5.2 Flames and hot gases (including hot particles).....	13
5.3 Mechanically generated impact, friction and abrasion.....	13
5.4 Electrical equipment and components.....	14
5.5 Stray electric currents, cathodic corrosion protection	14
5.6 Static electricity	14
5.7 Lightning	15
5.8 Radio frequency (RF) electromagnetic waves from 10^4 Hz to 3×10^{11} Hz	15
5.9 Electromagnetic waves from 3×10^{11} Hz to 3×10^{15} Hz	15
5.10 Ionizing radiation.....	16
5.11 Ultrasonic waves	16
5.12 Adiabatic compression and shock waves	16
5.13 Exothermic reactions, including self-ignition of dusts.....	17
6 Risk reduction	17
6.1 Fundamental principles	17
6.2 Avoidance or reduction of the amount of hazardous explosive atmospheres.....	18
6.2.1 Process parameters.....	18
6.2.2 Design and construction of equipment, protective systems and components	19
6.3 Hazardous areas	21
6.4 Requirements for the design and construction of equipment, protective systems and components for avoidance of effective ignition sources.....	21
6.4.1 General.....	21
6.4.2 Hot surfaces.....	22
6.4.3 Flames and hot gases	24

6.4.4	Mechanically generated impact, friction and grinding.....	24
6.4.5	Electrical equipment and components	25
6.4.6	Stray electric currents and cathodic corrosion protection	25
6.4.7	Static electricity.....	26
6.4.8	Lightning	26
6.4.9	Radio frequency (RF) electromagnetic waves from 10^4 Hz to 3×10^{11} Hz.....	27
6.4.10	Electromagnetic waves from 3×10^{11} Hz to 3×10^{15} Hz.....	28
6.4.11	Ionizing radiation	28
6.4.12	Ultrasonic waves	29
6.4.13	Adiabatic compression and shock waves.....	30
6.4.14	Exothermic reactions, including self-ignition of dusts	31
6.5	Requirements for the design and construction of equipment, protective systems and components to reduce the explosion effects	31
6.6	Provisions for emergency measures	32
6.7	Principles of measuring and control systems for explosion prevention and protection	32
7	Information for use	33
7.1	General	33
7.2	Information for commissioning, maintenance and repair to prevent explosion	34
7.3	Qualifications and training	34
	Annex A (informative) Information for the use of tools in potentially explosive atmospheres.....	35
	Annex B (informative) Tightness of equipment	36
B.1	General	36
B.2	Normal tightness.....	36
B.3	Enhanced tightness	37
	Annex C (normative) Verification procedure for the threshold limit of ultrasound in liquids....	38
	Annex D (informative) Significant technical changes between this document and the previous edition of this document.....	40
	Annex ZA (informative) Relationship between this European Standard and the essential requirements of EU Directive 2014/34/EU aimed to be covered.....	42
	Annex ZB (informative) Relationship between This document and the essential requirements of Directive 2006/42/EC aimed to be covered.....	43
	Bibliography	44
