ISO/TR 22100-4:2018-12 (E)

Safety of machinery - Relationship with ISO 12100 - Part 4: Guidance to machinery manufacturers for consideration of related IT-security (cyber security) aspects

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 1

4 General characterization of safety of machinery versus IT-security 3
4.1 Principle objectives 3
4.2 Different elements of risk 4
4.3 Consequences for risk assessment process 5

5 Relationship to existing legal and standardization framework regarding safety of machinery 5
5.1 Legal framework 5
5.2 Standardization framework - Relationship to ISO 12100 5

6 Relationship between safety of machinery and IT-security 5

7 Essential steps to address IT-security over the whole life cycle of the machine 7

8 Generic guidance for assessing IT-security threats regarding their possible influenceonsafetyofmachinery 8

9 Roles to address IT-security issues with possible relevance to safety of machinery 9

10 Guidance for machine manufacturers to address IT-security issues with possible relevance to safety of machinery 11
10.1 General 11
10.2 Selection of appropriate components (hardware/software) 11
10.3 Appropriate machine design 12
10.4 Instruction handbook (guidance to the machine user) 12

Annex A (informative) Example of a legal framework 14
