ISO 14119:2024-09 (E)

Safety of machinery - Interlocking devices associated with guards - Principles for design and selection

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Termsanddefinitions 2

4 Symbols 9

5 Operating principles and types of interlocking devices associated with guards 10
5.1 General 10
5.2 Principles of guard interlocking without guard locking 13
5.3 Principles of guard interlocking with guard locking 13
5.3.1 General 13
5.3.2 Interlocking device with guard locking 14

6 Requirements for the design and the arrangements of interlocking devices with and without guard locking 16
6.1 General 16
6.2 Arrangement and fastening of position switches, bolt locks and access locks 16
6.3 Arrangement and fastening of actuators 17
6.3.1 General 17
6.3.2 Cams 17
6.4 Actuation modes of interlocking devices 17
6.5 Mechanical stop 18
6.6 Additional requirements on guard-locking devices 18
6.6.1 General 18
6.6.2 Locking force 19
6.6.3 Electromechanical guard-locking device 19
6.6.4 Electromagnetic guard-locking device 20
6.7 Additional requirements on access locks 21
6.7.1 General 21
6.7.2 Locking force 21
6.8 Whole body access 22
6.9 Supplementary releases 22
6.9.1 Escape release of guard locking 22
6.9.2 Auxiliary release of guard locking 22
6.9.3 Emergency release of guard locking 23
6.10 Interlock blocking 23

7 Selection of an interlocking device 23
7.1 General 23
7.2 Selection of a guard-locking device 24
7.2.1 Overall system response time and access time 24
7.2.2 Specific requirements for selection of guard-locking devices 24
7.2.3 Selection of supplementary guard-locking releases 25
7.3 Environmental conditions considerations 26
7.3.1 General 26

7.3.2 Influence of dust on Type 2 and Type 5 interlocking devices 26
7.4 Considerations for the application of trapped key interlocking systems 26

8 Design to minimize the motivation to defeat 26
8.1 System design 26
8.2 Methodology procedure 27
8.3 Additional measures to minimize possibility of defeat 28
8.4 Additional measures to minimize possibility of defeat for Type 5 devices 32
8.4.1 General 32
8.4.2 Key retention 32

8.4.3 Reproduction of keys 33

9 Requirements for the control system 33
9.1 General 33
9.2 Assessment of faults and fault exclusions 33
9.2.1 Assessment of faults 33
9.2.2 Fault exclusion 34
9.2.3 Examples for measures to prevent common cause failures through direct and non-direct mechanical action of the position switches of Type 1 interlocking devices 36
9.2.4 Energy source diversity 38
9.3 Release of guard-locking device 38
9.4 Series connection of electro-mechanical interlocking devices 38
9.5 Electrical and environmental conditions 38
9.5.1 General 38
9.5.2 Performance considerations 39
9.5.3 Immunity from disturbance 39
9.5.4 Electrical operating conditions 39
9.5.5 Clearances and creepage distances 39

10 Information for use 39
10.1 General 39
10.2 Information for use given by the manufacturer of interlocking devices 39
10.2.1 Marking 39
10.2.2 Instructions 40
10.3 Information for use given by the manufacturer of the machine 41

Annex A (informative) Type 1 interlocking device -- Examples 42

Annex B (informative) Type 2 interlocking device -- Examples 47

Annex C (informative) Type 3 interlocking device -- Example 49

Annex D (informative) Type 4 interlocking devices -- Examples 51

Annex E (informative) Example of guard-locking devices 54

Annex F (informative) Application examples of interlocking devices used within a safety function .. 59

Annex G (informative) Motivation to defeat interlocking devices (defeating of protective devices) ... 65

Annex H (informative) Examples for maximum static action forces 69

Annex I (normative) Test procedures 71

Annex J (normative) Evaluation of fault masking in series connections of interlocking devices with potential free contacts 73

Annex K (normative) Trapped key interlocking systems 89
