DIN EN 17199-5:2026-07 (E)

Workplace exposure - Measurement of dustiness of bulk materials that contain or release respirable NOAA or other respirable particles - Part 5: Vortex shaker method

Contents

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 7

3 Terms and definitions 7

4 Symbols and abbreviations 8

5 Principle 8

6 Equipment 10
6.1 General 10
6.2 Test apparatus 12
6.2.1 Vortex shaker apparatus 12
6.2.2 Cylindrical container 12
6.2.3 Humidification system of incoming and dilution air 15
6.2.4 Sampling line for the measurement of the respirable dustiness mass fraction 16
6.2.5 Sampling line for other measurements 18
6.2.6 Conductive flexible tubing, carbon impregnated 20
6.2.7 Respirable cyclone, made of stainless steel 20
6.2.8 Air sampling cassette 21
6.2.9 Condensation particle counter (CPC), with alcohol as working fluid 21
6.2.10 Time- and size-resolving aerosol instrument 21
6.2.11 Aerosol sampler for analytical electron microscopy analysis 22
6.2.12 Analytical balance, capable of weighing to a resolution of 10 µg 22
6.2.13 Microbalance, capable of weighing to a resolution of 1 µg 22
6.2.14 Filters for gravimetric analysis 22
6.2.15 Micro-centrifuge tubes 22

7 Requirements 23
7.1 General 23
7.2 Engineering control measures 23
7.3 Conditioning of the test material 23
7.3.1 General 23
7.3.2 Specified conditions 23
7.3.3 As-received conditions 23
7.4 Conditioning of the test equipment 23

8 Preparation 23
8.1 Test sample 23
8.2 Moisture content of the test material 24
8.3 Bulk density of the test material 24
8.4 Preparation of test apparatus 24
8.5 Aerosol instruments and aerosol samplers 25

9 Test procedure 25

10 Evaluation of data 28
10.1 Respirable dustiness mass fraction 28
10.2 Number-based dustiness index, number-based emission rate and modal aerodynamic equivalent diameters of the particle size distribution 29
10.2.1 General 29
10.2.2 Number-based dustiness index 29
10.2.3 Number-based emission rate 29
10.2.4 Modal aerodynamic equivalent diameters of the number-based particle size distribution 30
10.3 Morphological and chemical characterization of the particles 31

11 Test report 31

Annex A (informative) Pictures illustrating some of the equipment of the method 33

Annex B (informative) Examples of TEM images obtained with the vortex shaker method 35

Annex C (informative) Motivation for development of the vortex shaker method 36
