

DIN EN 71-20:2026-02 (E)

Safety of toys - Part 20: Microbiological safety of toys containing accessible aqueous media

Contents		Page
European foreword		3
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	7
4	General	8
5	Risk assessment and exemptions from testing	9
5.1	Exemption from Clause 6	9
5.2	Exemption from Clause 7	9
6	Microbiological cleanliness	9
6.1	Microbiological cleanliness requirements	9
6.1.1	Total aerobic microbial count (TAMC) and bile-tolerant gram-negative bacteria	9
6.1.2	Specified organisms	11
6.2	Microbiological cleanliness test methods	11
7	Microbiological challenge (preservation effectiveness)	12
7.1	Preservation effectiveness requirements	12
7.2	Preservation effectiveness test method	12
Annex A (informative) Background and rationale for this European Standard		13
A.1	Scope	13
A.2	Risk assessment and exemptions from testing	13
A.3	Microbiological cleanliness	14
A.4	Microbiological challenge (preservation effectiveness)	14
Annex B (informative) Process water -- Manufacturing aqueous toy materials		15
Annex ZA (informative) Relationship between this European Standard and the essential requirements of Directive 2009/48/EC (OJ L 170, 30.6.2009, p. 1) aimed to be covered		16
