

ISO 3864-2:2004-10 (E)

Graphical symbols - Safety colours and safety signs - Part 2: Design principles for product safety labels

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Purpose of safety colours	4
4.1	General	4
4.2	Contrast colours	4
4.3	Use of colour	4
5	Hazard severity panels	5
5.1	General	5
5.2	Layout of hazard severity panels	5
5.3	Signal word options	5
6	Type and layout of product safety labels	6
6.1	General	6
6.2	Single safety sign	6
6.3	Safety sign used with a separated supplementary-safety-information text panel	7
6.4	Safety sign used with a separated supplementary safety information text panel which includes a hazard severity panel	7
6.5	Combination product safety label which does not incorporate a hazard severity panel	7
6.6	Combination product safety label which incorporates a hazard severity panel	8
6.7	Multiple product safety label not incorporating a hazard severity panel	9
6.8	Multiple product safety label which incorporates a hazard severity panel	10
Annex A (informative)	Guidelines for increasing the recognition of product safety label components	11
Annex B (informative)	Translation of signal words	13
Annex C (informative)	Examples of product safety labels	14
Annex D (informative)	Product safety label development considerations	18
Annex E (informative)	References from colour order systems for safety colour orange	21
