

DIN 2403:2007-05 (E)

Identification of pipelines according to the fluid conveyed

Contents	Page
Foreword	4
1 Scope	4
2 Normative references	4
3 Terms and definitions	5
4 Identification requirements	5
4.1 General	5
4.2 Allocation of colours to pipe contents	6
5 Type and means of identification	7
5.1 General	7
5.2 Arrangement of information within the identification	7
5.2.1 Arrangement of general information	7
5.2.2 Arrangement of supplemental information	7
5.3 Identification by means of painting and lettering or tapes/bands	7
5.4 Identification by means of labels, signs or plates	7
5.5 Design principles, dimensions, safe viewing distance and character height	7
5.6 Examples	9
6 Identifying pipelines for special purposes	10
6.1 Pipelines for supplying fire extinguishing media (fire mains)	10
6.2 Water supply systems	11
Annex A (informative) Hazard symbols, hazard statements and warning signs	13
Bibliography	15
Figures Figure 1 -- Arrow showing flow direction (ISO 7000-0251)	8
Figure 2 -- Vapour	9
Figure 3 -- Acetylene (highly flammable gas)	9
Figure 4 -- Hot water at 90 °C	9
Figure 5 -- Caustic soda (sodium hydroxide), band	10
Figure 6 -- Fire extinguishing medium - Water	10
