Foreword 4

Introduction 5

1 Scope 6

2 Terms and definitions 6

3 Requirements 6
3.1 General, including innocuousness 6
3.2 Ergonomics 7
3.3 Sizing 7
3.4 Restraint 7
3.5 Stud impact resistance 7
3.6 Blunt impact performance 7

4 Test methods 7
4.1 General 7
4.2 Sampling and conditioning of the test samples 8
4.3 Test area marking 8
4.4 Innocuousness 9
4.5 Ergonomics 12
4.6 Restraint 12
4.7 Stud impact 13
4.8 Blunt impact test 18

5 Marking 23

6 Information supplied by the manufacturer 24

Annex A (informative) Significant technical changes between this European Standard and the Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 89/686/EEC 26

Bibliography 27

Figures Figure 1 -- A plan diagram of the test area of a shin guard 8

Figure 2 -- Radius gauge for assessing external ridges 8

Figure 3 -- Diagram of the use of radius gauges on external ridges of a shin guard 10

Figure 4 -- The points of attachment of clamps and the direction of the force to be applied in restraint testing 11

Figure 5 -- Diagram illustrating the principles of the design of a horizontal cone stud impact apparatus 13

Figure 6 -- Diagram illustrating the construction tolerances on the guidance and falling block system 14

Figure 7 -- Diagram illustrating the principles of the design of the vertical inclined cone stud impact apparatus 16

Figure 8 -- Dimensions of the leg form cone 20

Figure 9 -- Diagram of the vertical impact anvil design 21

Figure 10 -- View of the falling mass 21

Figure 11 -- Plan view of the strap system to hold the shin guard in place on the leg form 22

Figure 12 -- A shin guard held down by a strap system on the leg form cone 23
