

DIN EN 1384:2012-05 (E)

Helmets for equestrian activities

Contents		Page
Foreword		4
Introduction		5
1	Scope	6
2	Normative references	6
3	Terms and definitions	6
4	Construction	7
4.1	General	7
4.2	Materials	7
4.3	Finish	7
4.4	Retention system	7
4.5	Headforms	8
5	Performance requirement	8
5.1	Shock absorption	8
5.2	Penetration	8
5.3	Retention system strength	9
5.4	Retention system effectiveness	9
5.5	Peak deflection	9
6	Testing	9
6.1	Assessment of extent of the area of protection and marking of test area	9
6.2	Test sequence and time schedule	10
6.3	Conditioning before testing	11
6.3.1	High temperature conditioning	11
6.3.2	Low temperature conditioning	11
6.3.3	Artificial ageing and moisture conditioning	11
6.4	Shock absorption test	11
6.4.1	Principle	11
6.4.2	Apparatus	11
6.5	Determination of resistance to penetration	15
6.5.1	Principle	15
6.5.2	Apparatus	15
6.5.3	Procedure	15
6.6	Test for strength of retention system	16
6.6.1	Principle	16
6.6.2	Apparatus	16
6.6.3	Procedure	16
6.7	Test for effectiveness of retention system	16
6.7.1	Principle	16
6.7.2	Apparatus	16
6.7.3	Procedure	19
6.8	Test for deflection of the peak	19
6.8.1	Principle	19
6.8.2	Apparatus	19
6.8.3	Test procedure	19
7	Marking and labelling	19

7.1	Marking	19
7.2	Information and instruction for the user	20
	Annex A (informative) Alternative procedure for artificial ageing	21
	Annex B (informative) Significant technical changes between this European Standard and Annex ZA (informative) Relationship between this European Standard and the Essential Requirements of EU Directive 89/686/EEC Personal Protective Equipment	23
	Bibliography	24
