ISO 20957-5:2016-12 (E)

Stationary training equipment - Part 5: Stationary exercise bicycles and upper b ody crank training equipment, additional specific safety requirements and test methods

Contents

Page

Foreword v

Introduction vi

1 Scope 1

2 Normative references 1

3 Terms and definitions 1

4 Classification 3

5 Safety requirements 6
5.1 General 6
5.2 External construction 6
5.2.1 Transmission elements and rotating parts 6
5.2.2 Temperature rise 7
5.3 Intrinsic loading 7
5.3.1 Seat pillar and frame 7
5.3.2 Handlebar and frame 7
5.3.3 Pedal and frame 7
5.4 Seat pillar -- Seat 7
5.4.1 Insertion depth 7
5.4.2 Seat adjustment 8
5.4.3 Seat tilting 8
5.5 Handlebar stem 8
5.6 Stability 8
5.7 Additional requirements for recumbent stationary exercise bicycles, upper body crank training equipment and combined crank training equipment 8
5.7.1 Combined crank training equipment 8
5.7.2 Seat system 8
5.8 Additional classified requirements 9
5.9 Endurance 11
5.10 Additional instructions for use 11
5.11 Additional warnings 12

6 Test methods 12
6.1 General 12
6.1.1 Dimensional check 12
6.1.2 Visual examination 12
6.1.3 Tactile examination 12
6.1.4 Performance test 12
6.2 Testing of temperature rise 12
6.3 Testing of transmission elements and rotating parts 13
6.3.1 Crank and protective cover finger probe examination 13
6.3.2 Other moving parts finger probe examination 13
6.4 Testing of intrinsic loading 13
6.4.1 Seat pillar and frame 13
6.4.2 Handlebar and frame 13
6.4.3 Pedal and frame 14
6.5 Testing of seat tilting 14

6.6 Testing of seat back rest 14
6.7 Testing of stability 14
6.8 Description of the test device 14
6.9 Testing of constant power mode 15
6.10 Testing of heart rate control mode 15
6.11 Testing of power accuracy for class A 15
6.11.1 General 15
6.11.2 Speed dependent crank training equipment 15
6.11.3 Speed independent crank training equipment 16
6.12 Testing of power repeatability for class B 17
6.13 Endurance test 17
6.13.1 Speed independent crank training equipment 17
6.13.2 Speed dependent crank training equipment 17

7 Test report 18

Annex A (informative) Example of determining the moment of inertia J (looking from the driving axis into a system) 19
