

# DIN EN 1177:2018-03 (E)

## Impact attenuating playground surfacing - Methods of test for determination of impact attenuation

---

<b>Contents</b>		<b>Page</b>
European foreword .....		4
Introduction .....		6
1	Scope .....	8
2	Normative references .....	8
3	Terms and definitions .....	8
4	Test apparatus .....	9
4.1	Suitability .....	9
4.2	Components of the apparatus .....	10
4.3	Accuracy of apparatus .....	12
4.3.1	Calibration by a laboratory .....	12
4.3.2	Checks by operators .....	12
5	Testing procedure .....	13
5.1	Principle of impact measurement .....	13
5.2	Selection and definition of test positions .....	14
6	Test Method 1 - Determination of Critical Fall Height (CFH) .....	15
6.1	Principle .....	15
6.2	Testing in the laboratory .....	15
6.3	Testing on site .....	17
7	Test Method 2 - Determination of Impact Attenuation on site .....	18
7.1	Principle .....	18
7.2	Selection and recording of test positions .....	18
7.3	Carrying out the test .....	19
7.4	Results .....	19
8	Reports .....	19
8.1	General .....	19
8.2	Tests carried out in the laboratory with Method 1 .....	19
8.3	Tests carried out on site in accordance with Method 1 .....	20
8.4	Tests carried out on site in accordance with Method 2 .....	21
Annex A (informative) Test rig for determination of impact attenuation .....		22
Annex B (informative) Typical examples of trace of acceleration against time and curve of HIC and g <sub>max</sub> values against drop height .....		23
Annex C (informative) Verification of computer algorithm used for the calculation of HIC (see 4.3.1.4) .....		25
Annex D (normative) Procedure for selection of test positions in playgrounds for Method 2 (see Clause 7) .....		26
D.1	Principle .....	26
D.2	Criteria for selection of test zones (3.12) .....	26

<b>Annex E (normative) Method for compaction of loose particulate impact attenuating material (see 6.2.4.5.1)</b> .....	<b>31</b>
<b>E.1 General</b> .....	<b>31</b>
<b>E.2 Measurement of layer thickness</b> .....	<b>31</b>
<b>E.3 Compaction procedure</b> .....	<b>31</b>
<b>Annex F (informative) Example of a regime for checking the function of an HIC test apparatus</b> .....	<b>33</b>
