

DIN EN ISO 1825:2011-07 (E)

Rubber hoses and hose assemblies for aircraft ground fuelling and defuelling - Specification (ISO 1825:2010)

Contents		Page
Foreword		3
Introduction		4
1 Scope		5
2 Normative references		5
3 Terms and definitions		6
4 Classification		7
5 Service reeling diameter		7
6 Materials and construction		7
7 Dimensions and tolerances		8
8 Physical properties		9
9 Electrical properties		11
10 Frequency of testing		12
11 Marking		12
12 Test certificate/report		13
13 Cleanliness		13
14 Protection for dispatch and storage		13
Annex A (normative) Method for determination of fuel-soluble matter		14
Annex B (normative) Method of test for cold embrittlement		15
Annex C (normative) Method for determination of adhesion between components		16
Annex D (normative) Method for determination of resistance to fuel contamination		17
Annex E (normative) Method of test for flexibility at 20 °C		18
Annex F (normative) Method of test for flexibility at 30 °C		19
Annex G (normative) Method of test for crush recovery		20
Annex H (normative) Method for determination of cyclic kinking resistance		21
Annex I (normative) Flammability test		22
Annex J (normative) Hydrostatic tests		24

Annex K (normative) Method of test for vacuum resistance	25
Annex L (normative) Method of test for security of attachment of couplings	26
Annex M (normative) Type testing and routine testing	27
Annex N (informative) Recommended tests for production acceptance testing	28
Annex O (informative) Recommended practice for hose flushing and handling	29
Bibliography	31
