DIN EN 16321-1:2013-12 (E)

Petrol vapour recovery during refuelling of motor vehicles at service stations - Part 1: T est methods for the type approval efficiency assessment of petrol vapour recovery systems

Contents

Page

Foreword 4

1 Scope 5

2 Normative references 5

3 Terms and definitions 5

4 Requirements 8
4.1 General 8
4.2 Efficiency 8
4.3 Petrol vapour /petrol ratio 8
4.4 Proportionality 9
4.5 Correction factor 10
4.6 Vapour processing unit 10

5 Measurement and test methods for the assessment of petrol vapour recovery systems at service stations 11
5.1 General test conditions 11
5.2 Efficiency test 11
5.2.1 General 11
5.2.2 Test tanks 12
5.2.3 Test procedure 13
5.2.4 Test refuelling 14
5.2.5 Adsorber 14
5.2.6 Calculation of the efficiency 14
5.3 Petrol vapour/petrol ratio 14
5.3.1 General 14
5.3.2 Test procedure 15
5.4 Proportionality test 16
5.4.1 General 16
5.4.2 Test procedure 16
5.5 Correction factor determination 17
5.5.1 General 17
5.5.2 Test with petrol vapour 17
5.5.3 Test with air 17
5.6 Retesting criteria for modifications 19

6 Automatic monitoring systems 19

7 Environmental aspects 19

8 Certificate for vapour recovery systems 19

9 Marking 19

Annex A (normative) List of representative tanks 20

Annex B (normative) Retesting criteria for modifications 21

Annex C (normative) Certificate format **22**

Annex D (normative) Monitoring system **23**

D.1 General **23**
D.2 Requirements **23**
D.3 Measurement and test methods **24**
D.3.1 Test for pressure loss **24**
D.3.2 Test for detection of a vapour recovery efficiency error **24**
D.3.3 Test for an alarm when the monitor detects an error during a self-test **24**
D.3.4 Test for de-activation of a delivery point **25**
D.4 Example monitoring system certificate **25**

Annex E (informative) Identification of petrol vapour recovery systems **26**

Annex F (informative) Environmental aspects **27**

Bibliography **28**
