DIN EN 16820:2017-10 (E)

Rubber and plastics hoses and hose assemblies for use in the pharmaceutical and biotechnological industry - Bonded elastomeric hoses with or without a lining

Contents

Page

European foreword 4

1 Scope 5

2 Normative references 5

3 Classifications and conditions of use 6
3.1 Hose types 6
3.2 Hose grades 7
3.3 Hose designs 7
3.4 Hose assembly designs 7

4 Dimensions 7
4.1 Inside diameter, minimum thickness of the lining, bending radii 7
4.2 Concentricity 9
4.3 Length and tolerances for the hose assemblies 9
4.4 Minimum bending radius 9

5 Materials 10

6 Requirements and tests 11
6.1 Physical properties 11
6.2 Electrical properties 13

7 Designs/types of connection 13

8 Manufacturing of the hose assembly 14

9 Frequency of testing 15

10 Marking 15
10.1 Marking of the hoses 15
10.2 Marking of the fittings 16
10.3 Marking of the hose assemblies 16

11 Installation and user instructions 16

12 Storage and permissible storage time 17

Annex A (normative) Test procedure to determine the electrical resistance through the wall of hoses 18

A.1 General 18
A.2 Test procedure for hoses (without end fittings) 18
A.2.1 Preparation for the test 18
A.2.2 Electrodes and contacts 18
A.2.3 Preparation and cleaning for test 18
A.2.4 Conditioning 18
A.2.5 Test procedure 19

Annex B (normative) Testing of crushing strength (only for hose type SD) 20

Annex C (normative) Behaviour to fire exposure **22**

C.1 Test specimen **22**
C.2 Test equipment **22**
C.3 Test procedure **22**

Annex D (normative) Surface roughness and design of hose couplings **24**

Annex E (normative) Test frequencies for type tests and routine tests **25**

Annex F (informative) Production acceptance tests **26**

Bibliography **27**
