

# DIN EN 13094:2020-10 (E)

## Tanks for the transport of dangerous goods - Metallic gravity-discharge tanks - Design and construction

---

Contents		Page
European foreword .....		5
1 Scope .....		7
2 Normative references .....		7
3 Terms, definitions, symbols and abbreviations .....		9
3.1 Terms and definitions .....		9
3.2 Symbols .....		10
3.3 Abbreviations .....		11
4 Service equipment .....		11
5 Materials .....		11
5.1 General .....		11
5.2 Material properties .....		12
5.3 Compatibility of tank materials with substances carried .....		13
6 Design .....		14
6.1 Shell cross-section .....		14
6.2 Design verification .....		16
6.3 Dynamic conditions .....		17
6.4 Pressure conditions .....		18
6.5 Partial vacuum conditions .....		18
6.6 Design temperature .....		18
6.7 Design stress .....		18
6.8 Shell thicknesses .....		18
6.9 Shell openings, neck rings and closures .....		23
6.10 Shell partitions, surge plates and baffles .....		24
6.11 Shell supporting structure .....		24
6.12 Other attachments to the shell .....		25
6.13 Pipework passing through the shell .....		25
6.14 Protection of service equipment mounted on the tank top .....		26
6.15 Electrical bonding and earthing .....		33
7 Manufacture of the shell .....		33
7.1 General .....		33
7.2 Cutting and edge preparation .....		33
7.3 Forming .....		34
7.4 Welding .....		34
7.5 Manufacturing tolerances .....		36
7.6 Rectification of defects .....		37
8 Marking .....		37
Annex A(informative) Methods of design verification .....		38
A.1 General .....		38
A.2 Dynamic testing .....		38
A.2.1 Methods for the verification of the loads specified in 6.3.2 .....		38
A.2.2 Test programme .....		39

A.3	Finite element method .....	39
A.3.1	General .....	39
A.3.2	Software selection .....	40
A.3.3	Validation .....	40
A.3.4	Finite element mesh .....	41
A.3.5	Mesh criteria .....	41
A.3.6	Approval .....	42
A.3.7	Requirements relating to the methods for determining stresses .....	42
A.3.8	Assessment criteria .....	43
A.3.9	Permanent record .....	45
A.4	Reference design .....	45
A.5	Calculation method -- worksheet .....	46
A.5.1	Introduction .....	46
A.5.2	Symbols and units .....	48
A.5.3	Adopted thicknesses .....	54
A.5.4	Mandatory thicknesses .....	54
A.5.4.1	Calculated thicknesses .....	54
A.5.5	Verification of stresses at test pressure .....	55
A.5.6	Verification of stresses in service condition .....	58
A.5.7	Calculation of stress in shell attachments .....	64
A.5.8	End made up of several welded elements .....	65
<b>Annex B(normative) Method of measurement of specific resilience .....</b>		<b>66</b>
B.1	Principle .....	66
B.2	Apparatus .....	66
B.3	Samples of materials to be tested .....	70
B.4	Procedure .....	71
B.5	Results .....	72
B.5.1	Test values .....	72
B.5.2	Calculation of results .....	73
B.5.3	Acceptability of material .....	73
B.6	Global resilience [see 6.8.2.2 i)] .....	73
B.7	Comparative methods to calculate the energy absorbed during an overturning or impact [see 6.8.2.2 j)] .....	73
B.7.1	Calculation of absorbed energy .....	73
B.7.2	Test procedure .....	74
B.7.3	Finite element analysis procedure to be adopted .....	74
<b>Annex C(normative) Design of neck rings, flanges and closures .....</b>		<b>75</b>
<b>Annex D(informative) Examples of welding details .....</b>		<b>76</b>
D.1	General .....	76
D.2	Shell construction .....	76
D.2.1	Fillet welds .....	76
D.2.2	Joint types .....	78
D.3	Attachment of reinforcements .....	88
D.3.1	Attachment of reinforcements designed to absorb dynamic stress .....	88
D.3.2	Attachment of reinforcements not designed to absorb dynamic stress .....	88
D.4	Attachment of branches .....	89
D.5	Attachment of flanges, collars and reinforcing pads to the shell .....	91
D.6	Attachment of flanges onto branches .....	92
D.7	Attachment of heating channels to shells .....	93
<b>Bibliography .....</b>		<b>95</b>
