DIN EN 13483:2022-12 (E)

Rubber and plastic hoses and hose assemblies with internal vapour recovery for measured fuel dispensing systems - Specification

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 6

3 Terms and definitions 7

4 Classification 7

5 Materials and construction 7
5.1 Fuel hose 7
5.2 Vapour hose 8
5.3 Vapour tubing 8
5.4 Vapour recovery fuel hose assembly 8

6 Pressure requirements 8

7 Dimensions and tolerances 8
7.1 Diameters and bend radii 8
7.2 Minimum thickness of lining and cover of the fuel hose 9
7.3 Concentricity 9
7.4 Tolerance on cut lengths 9

8 Physical properties 9
8.1 Compounds 9
8.2 Finished hoses/tubing 11
8.3 Hose assembly 13

9 End fittings 13

10 Type tests 14

11 Frequency of testing 14

12 Marking 15
12.1 Hoses 15
12.2 End fittings 15
12.3 Hose assemblies 15

Annex A (normative) Test method for determination of low temperature class resistance at -30 °C (for normal temperature class) and -40 °C (for low temperature class) 16

Annex B (normative) Test method for pressure requirements of vapour recovery hoses and tubes ..17

Annex C (normative) Test method for determination of change in length due to swelling 18

Annex D (normative) Test method for determination of pressure loss 19

Annex E (normative) Method for determination of adhesion between components 20

Annex F (normative) Test method for the determination of low temperature flexibility 21

Annex G (normative) Test method for the determination of rate of fuel permeation 23

Annex H (normative) Test method for flammability 24

Annex I (normative) Test method for the determination of leakage (leak test) 26

Annex J (normative) Test method for fatigue strength under reversed bending stresses (flex test) . 27

Annex K (normative) End-fitting pull-off test 29

Annex L (normative) Test frequency for type tests and routine tests 30

Annex M (informative) Test frequency for production acceptance tests 32

Annex N (informative) Environmental checklist 34
