DIN EN 14025:2025-08 (E)

Tanks for the transport of dangerous goods - Metallic pressure tanks - Design and construction (includes Corrigendum :2024)

Contents

Page

European foreword 5

1 Scope 7

2 Normative references 7

3 Terms, definitions and symbols 8
3.1 Terms and definitions 8
3.2 Symbols 9

4 Materials 10
4.1 General 10
4.2 Compatibility 11

5 Design 11
5.1 General 11
5.2 Minimum shell thickness 11
5.3 Reduction of shell thickness 12
5.4 Protection of the shell 12
5.5 Protection of equipment 13
5.6 Other design requirements 13

6 Calculation 14
6.1 General 14
6.1.1 General 14
6.1.2 Calculation scheme for the wall thickness of metallic pressure tanks of RID/ADR Chapter 6.8 14

Figure 1 -- Calculation scheme for the wall thickness of metallic pressure tanks of Chapter 6.8 of RID/ADR 15
6.1.3 Calculation scheme for the wall thickness of metallic portable pressure tanks of RID/ADR Chapter 6.7 15

Figure 2 -- Calculation scheme for the wall thickness of metallic portable pressure tanks of Chapter 6.7 of RID/ADR 16
6.2 Design criteria 17

Table 1 -- Design criteria for Chapter 6.8 tanks 17

Table 2 -- Design criteria for Chapter 6.7 tanks 18
6.3 Calculation for internal pressure 18
6.3.1 General 18
6.3.2 Wall thickness of the cylindrical section 18
6.3.3 Wall thickness of ends 18

Figure 3 -- Geometry of ends 19

Figure 4 -- Position of welds in ends 20

Table 3 -- Procedure for calculation of weakening factor k for openings in the knuckle region (design) 22

6.3.4 Wall thickness of conical sections ... 22

Figure 5 -- Junction between cylinder and cone; angle ... 23

Figure 6 -- Geometry of cone/cylinder intersection; small end ... 24
6.3.5 Openings and reinforcements ... 25

Figure 7 -- Wall thickness ratio for branches ... 25

Figure 8 -- Shells with isolated openings; examples for reinforcement ... 29
6.3.6 Manhole covers ... 32

Figure 9 -- Circular or elliptical flat cover with narrow faced gasket ... 33

Figure 10 -- Circular or elliptical flat cover with full faced gasket (for liquid only) ... 33

Figure 11 -- Coefficient Z for elliptical ends ... 34

Figure 12 -- Spherically domed and bolted cover with narrow faced gasket ... 36
6.3.7 Flanges, joints, bolts ... 37

Table 4 -- Gasket materials and contact facings: gasket factors m for operating conditions and minimum design seating stress y ... 37
6.4 Calculation for external pressure ... 39
6.4.1 General ... 39
6.4.2 Tanks, where external over pressure is part of operating conditions ... 39
6.4.3 Tanks, where external over pressure is not part of operating conditions ... 39
6.4.4 Test ... 39
6.5 Tank to frame connection/interface and other attachments ... 39

7 Construction and manufacturing ... 40
7.1 General requirements ... 40
7.2 Cutting ... 40
7.3 Forming ... 41
7.3.1 General ... 41
7.3.2 Cold forming ... 41
7.3.3 Hot forming ... 41
7.3.4 Ends ... 42
7.3.5 Heat treatment and normalizing ... 42
7.4 Welding ... 42
7.4.1 Qualification ... 42
7.4.2 Welded joints ... 42
7.4.3 Examination and testing of welds ... 43
7.4.4 Temporary attachments ... 43
7.5 Manufacturing tolerances ... 43
7.5.1 Plate alignment ... 43

Figure 13 -- Seams which do require a taper ... 44
7.5.2 Defects of form ... 44
7.5.3 Thickness ... 44
7.5.4 Dished ends ... 44
7.5.5 Cylindrical sections ... 44

8 Repairs ... 45
8.1 General ... 45
8.2 Repair of surface defects in the parent metal ... 45
8.3 Repair of weld defects ... 45

Annex A (informative) Sample calculation for tank containers according to RID/ADR Chapter 6.8 ... 46

A.1 Introduction ... 46
A.2 Dimensions, characteristics of materials, operating and testing conditions ... 46

Figure A.1 -- Sample tank, overview 47
A.3 Calculation according to branch A 47
A.4 Calculation according to branch B 47
A.5 Calculation according to branch C 48
A.6 Calculation according to branch D 50

Figure A.2 -- Example for a manhole opening 500 mm × 150 mm with neckring 200 mm × 5 mm as reinforcement 60
A.7 Results 60

Table A.1 -- Results of sample calculation (wall thickness e in mm; X not applicable) 61

Annex B (informative) Explosion pressure shock resistant design of tanks 62
