DIN EN 14620-5:2025-12 (E)

Design and manufacture of site built, vertical, cylindrical, flat-bottomed tank systems for the storage of refrigerated, liquefied gases with operating temperatures between 0 °C and -196 °C - Part 5: Testing, drying, purging and cool-down

European foreword 4

1 Scope 5

2 Normative references 6

3 Terms and definitions 6

4 Hydrostatic and pneumatic testing 6
4.1 Hydrostatic test 6
4.1.1 General 6
4.1.2 Test requirements for each type of tank 6
4.1.3 Additional requirements 7
4.1.4 Quality of the water 8
4.1.5 Conditions of implementation 10
4.1.6 Examination related to hydrostatic testing 10
4.1.7 Filling and emptying 11
4.1.8 Post emptying cleaning 11
4.2 Pneumatic test 11
4.2.1 General 11
4.2.2 Positive pressure test 11
4.2.3 Negative pressure test 12
4.2.4 Empty checks 13
4.2.5 Double-wall double-roof tank systems 13
4.3 Specific requirements for membrane tank testing 14
4.3.1 Hydrostatic test 14
4.3.2 Positive and negative pneumatic pressure tests 15
4.3.3 Global Test 16

5 Commissioning 16
5.1 General 16
5.2 Procedures 17
5.3 Drying 17
5.4 Purging 18
5.4.1 Purging with inert gas 18
5.4.2 Purging with product gas 18
5.5 Cool-down 18
5.6 Completion of commissioning activities 19

6 Decommissioning 19

Annex A (informative) Cool-down of the primary liquid container/membrane 21

A.1 General 21
A.2 Cool-down rates 21
A.2.1 Inner Tank 21
A.2.2 Membrane 21

Annex B (informative) Global test for membrane tanks 22

B.1 General 22
B.2 Intermediate monitoring 22
B.3 Test Phases 22
B.3.1 Concrete outer tank 22
B.3.2 Steel outer tank 23

Annex C (informative) Guidance for duties and responsibilities between parties 25

Annex D (normative) Requirements for non-destructive examinations (NDE) of steel containers supplementary to Table 14 EN 14620-2:2006 26

D.1 For steel primary containers 26
D.2 For steel secondary containers 26
D.3 For steel membrane tank outer containers 26
D.3.1 Hydrotested prior to Membrane installation 26
D.3.2 Hydrotested after Membrane installation 26
