

# DIN EN 14620-1:2006-12 (E)

Design and manufacture of site built, vertical, cylindrical, flat-bottomed steel tanks for the storage of refrigerated, liquefied gases with operating temperatures between 0 °C and -165 °C - Part 1: General

---

<b>Contents</b>		<b>Page</b>
Foreword .....		3
1	Scope .....	4
2	Normative references .....	4
3	Terms and definitions .....	5
4	Concept selection .....	9
4.1	Types of tank .....	9
4.2	Risk assessment .....	14
5	Quality assurance and quality control .....	17
6	Health, safety and environment plan .....	17
7	General design considerations .....	17
7.1	General .....	17
7.2	Protection systems .....	21
7.3	Actions (loadings) .....	23
8	Inspection and maintenance .....	27
Annex A (informative) Physical properties of gases .....		28
Annex B (normative) Design information .....		29
Annex C (normative) Seismic analysis .....		31
Annex D (informative) Tank heating system .....		34
Bibliography .....		36
Figures Figure 1 -- Examples of single containment tanks .....		11
Figure 2 -- Examples of double containment tanks .....		12
Figure 3 -- Examples of full containment tanks .....		13
Figure 4 -- Example of membrane tank .....		14
Tables Table A.1 -- Physical properties of pure gases .....		28
