

ISO/IEC Guide 98-3 Supplement 1:2008-11 (E)

Uncertainty of measurement - Part 3: Guide to the expression of uncertainty in measurement (GUM:1995) - Supplement 1: Propagation of distributions using a Monte Carlo method

| Contents | | Page |
|---|--|-------------|
| Foreword | | v |
| Introduction..... | | vi |
| 1 Scope | | 1 |
| 2 Normative references | | 2 |
| 3 Terms and definitions | | 2 |
| 4 Conventions and notation | | 6 |
| 5 Basic principles | | 8 |
| 5.1 Main stages of uncertainty evaluation | | 8 |
| 5.2 Propagation of distributions | | 9 |
| 5.3 Obtaining summary information | | 9 |
| 5.4 Implementations of the propagation of distributions | | 10 |
| 5.5 Reporting the results | | 11 |
| 5.6 GUM uncertainty framework | | 12 |
| 5.7 Conditions for valid application of the GUM uncertainty framework for linear models | | 13 |
| 5.8 Conditions for valid application of the GUM uncertainty framework for non-linear models | | 14 |
| 5.9 Monte Carlo approach to the propagation and summarizing stages | | 15 |
| 5.10 Conditions for the valid application of the described Monte Carlo method | | 16 |
| 5.11 Comparison of the GUM uncertainty framework and the described Monte Carlo method | | 17 |
| 6 Probability density functions for the input quantities..... | | 18 |
| 6.1 General | | 18 |
| 6.2 Bayes' theorem | | 19 |
| 6.3 Principle of maximum entropy | | 19 |
| 6.4 Probability density function assignment for some common circumstances | | 20 |
| 6.4.1 General | | 20 |
| 6.4.2 Rectangular distributions | | 20 |
| 6.4.3 Rectangular distributions with inexactly prescribed limits | | 20 |
| 6.4.4 Trapezoidal distributions | | 22 |
| 6.4.5 Triangular distributions | | 23 |
| 6.4.6 Arc sine (U-shaped) distributions..... | | 24 |
| 6.4.7 Gaussian distributions..... | | 25 |
| 6.4.8 Multivariate Gaussian distributions | | 25 |
| 6.4.9 <i>t</i> -distributions..... | | 26 |
| 6.4.10 Exponential distributions | | 28 |
| 6.4.11 Gamma distributions..... | | 28 |
| 6.5 Probability distributions from previous uncertainty calculations | | 29 |
| 7 Implementation of a Monte Carlo method..... | | 29 |
| 7.1 General | | 29 |
| 7.2 Number of Monte Carlo trials | | 29 |
| 7.3 Sampling from probability distributions | | 29 |
| 7.4 Evaluation of the model..... | | 30 |
| 7.5 Discrete representation of the distribution function for the output quantity..... | | 30 |
| 7.6 Estimate of the output quantity and the associated standard uncertainty | | 31 |
| 7.7 Coverage interval for the output quantity..... | | 31 |
| 7.8 Computation time | | 32 |
| 7.9 Adaptive Monte Carlo procedure..... | | 32 |
| 7.9.1 General | | 32 |
| 7.9.2 Numerical tolerance associated with a numerical value..... | | 32 |
| 7.9.3 Objective of adaptive procedure..... | | 33 |

| | | |
|-------|--|----|
| 7.9.4 | Adaptive procedure | 33 |
| 8 | Validation of results | 35 |
| 8.1 | Validation of the GUM uncertainty framework using a Monte Carlo method | 35 |
| 8.2 | Obtaining results from a Monte Carlo method for validation purposes | 35 |
| 9 | Examples | 36 |
| 9.1 | Illustrations of aspects of this Supplement | 36 |
| 9.2 | Additive model | 37 |
| 9.2.1 | Formulation | 37 |
| 9.2.2 | Normally distributed input quantities | 37 |
| 9.2.3 | Rectangularly distributed input quantities with the same width | 39 |
| 9.2.4 | Rectangularly distributed input quantities with different widths | 41 |
| 9.3 | Mass calibration | 42 |
| 9.3.1 | Formulation | 42 |
| 9.3.2 | Propagation and summarizing | 43 |
| 9.4 | Comparison loss in microwave power meter calibration | 45 |
| 9.4.1 | Formulation | 45 |
| 9.4.2 | Propagation and summarizing: zero covariance..... | 46 |
| 9.4.3 | Propagation and summarizing: non-zero covariance..... | 51 |
| 9.5 | Gauge block calibration | 53 |
| 9.5.1 | Formulation: model | 53 |
| 9.5.2 | Formulation: assignment of PDFs | 55 |
| 9.5.3 | Propagation and summarizing | 58 |
| 9.5.4 | Results | 59 |
| | Annex A Historical perspective | 61 |
| | Annex B Sensitivity coefficients and uncertainty budgets | 62 |
| | Annex C Sampling from probability distributions..... | 63 |
| C.1 | General..... | 63 |
| C.2 | General distributions..... | 63 |
| C.3 | Rectangular distribution | 64 |
| C.4 | Gaussian distribution | 65 |
| C.5 | Multivariate Gaussian distribution..... | 66 |
| C.6 | <i>t</i> -distribution | 67 |
| | Annex D Continuous approximation to the distribution function for the output quantity..... | 69 |
| | Annex E Coverage interval for the four-fold convolution of a rectangular distribution | 72 |
| | Annex F Comparison loss problem | 74 |
| F.1 | Expectation and standard deviation obtained analytically | 74 |
| F.2 | Analytic solution for zero estimate of the voltage reflection coefficient having associated zero covariance..... | 75 |
| F.3 | GUM uncertainty framework applied to the comparison loss problem | 76 |
| | Annex G Glossary of principal symbols..... | 78 |
| | Bibliography | 83 |
| | Alphabetical index | 86 |
