

# ISO 12180-1:2011-04 (E)

## Geometrical product specifications (GPS) - Cylindricity - Part 1: Vocabulary and parameters of cylindrical form

---

| <b>Contents</b>   |  | <b>Page</b> |
|---|--|-------------|
| Foreword .....  |  | iv          |
| Introduction .....  |  | v           |
| 1   | Scope .....  | 1           |
| 2   | Normative references .....                                   | 1           |
| 3   | Terms and definitions .....                                  | 1           |
| 3.1   | General terms .....  | 2           |
| 3.2   | Terms relating to the surface .....                          | 2           |
| 3.3   | Terms relating to the reference cylinder .....               | 4           |
| 3.4   | Terms relating to the circumference and the generatrix ..... | 5           |
| 3.5   | Terms relating to parameters .....                           | 5           |
| 4   | Radial cross-section deviations .....                        | 8           |
| 5   | Straightness deviations .....                                | 8           |
| Annex A (informative) Mathematical definition of cylindricity tolerances of nominal integral features ..... |  | 9           |
| Annex B (informative) Consideration in the assessment of deviations from cylindrical form .....             |  | 10          |
| Annex C (informative) Synoptic tables of terms, abbreviated terms and parameters .....                      |  | 12          |
| Annex D (informative) Relationship to the GPS matrix model .....  |  | 14          |
| Bibliography .....  |  | 16          |
