ISO 10790:1999-05 (E)

Measurement of fluid flow in closed conduits - Guidance to the selection, installation and use of Coriolis meters (mass flow, density and volume flow measurements)

Contents

Page

1 Scope 1

2 Terms and definitions 1

3 Coriolis meter selection criteria 3

4 Inspection and compliance 8

5 Mass flow measurement 8

6 Density measurement under metering conditions 11

7 Volume flow measurement under metering conditions 14

8 Additional measurements 16

Annex A (informative) Calibration techniques 19

Annex B (informative) Secondary containment of Coriolis meters 23

Annex C (informative) Coriolis meter specifications 25

Annex D (informative) Mass fraction measurement examples 26
