

ISO 5458:2018 (E)

Geometrical product specifications (GPS) — Geometrical tolerancing — Pattern and combined geometrical specification

Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	Symbols and specification modifiers
5	Principles
5.1	General
5.2	Concepts
5.3	Rule A: for position specification
5.4	Rules for pattern specification
5.4.1	General
5.4.2	Rule B: constraints
5.4.3	Rule C: indication of a single indicator pattern specification
5.4.4	Rule D: indication of a multiple indicator pattern specification
5.4.5	Rule E: indication of multi-level single indicator pattern specification
5.4.5.1	General
5.4.5.2	Sequences of modifiers
5.5	Pattern characteristic
Annex A	(informative) Former practice, important changes
A.1	Important changes
A.2	Former practice
Annex B	(informative) Differences between ISO 5458:1998 and this document
B.1	General
B.2	Examples of indication between ISO 5458:1998, ISO 1101:2017 and this edition of ISO 5458
Annex C	(informative) Examples of pattern specifications
Annex D	(normative) Relations and dimensions of graphical symbols
Annex E	(informative) Concept diagram for pattern specification and relation with modifiers
Annex F	(informative) Relation to the GPS matrix model
F.1	General
F.2	Information about the document and its use
F.3	Position in the GPS matrix model
F.4	Related International Standards
