ISO 5167-4:2022-06 (E)

Measurement of fluid flow by means of pressure differential devices inserted in circular cross-section conduits running full - Part 4: Venturi tubes

Contents

Page

Foreword ..... **v**

Introduction ..... **vi**

1 Scope **1**

2 Normative references **1**

3 Terms and definitions **2**

4 Principles of the method of measurement and computation **2**

5 Classical Venturi tubes **2**

5.1 Field of application 2

5.1.1 General 2

5.1.2 Classical Venturi tube with an “as cast” convergent section 3

5.1.3 Classical Venturi tube with a machined convergent section 3

5.1.4 Classical Venturi tube with a fabricated convergent section 3

5.2 General shape 3

5.2.1 General 3

5.2.2 Entrance cylinder 3

5.2.3 Convergent section 4

5.2.4 Throat 4

5.2.5 Divergent section 5

5.2.6 Truncated Venturi tube 5

5.2.7 Roughness 5

5.2.8 Classical Venturi tube with an “as cast” convergent section 5

5.2.9 Classical Venturi tube with a machined convergent section 6

5.2.10 Classical Venturi tube with a fabricated convergent section 6

5.3 Material and manufacture 7

5.4 Pressure tappings 7

5.5 Discharge coefficient, C 8

5.5.1 Limits of use 8

5.5.2 Discharge coefficient of the classical Venturi tube with an “as cast” convergent section 8

5.5.3 Discharge coefficient of the classical Venturi tube with a machined convergent section 9

5.5.4 Discharge coefficient of the classical Venturi tube with a fabricated convergent section 9

5.6 Expansibility [expansion] factor, ε 9

5.7 Uncertainty of the discharge coefficient, C 9

5.7.1 Classical Venturi tube with an “as cast” convergent section 9

5.7.2 Classical Venturi tube with a machined convergent section 9

5.7.3 Classical Venturi tube with a fabricated convergent section 10

5.8 Uncertainty of the expansibility [expansion] factor, ε 10

5.9 Pressure loss 10

5.9.1 Definition of the pressure loss 10

5.9.2 Relative pressure loss 10

6 Installation requirements **11**

6.1 General 11

6.2 Minimum upstream and downstream straight lengths for installation between various fittings and the Venturi tube 12

6.3 Flow conditioners 16

6.4 Additional specific installation requirements for classical Venturi tubes 16

6.4.1 Circularity and cylindricality of the pipe and alignment of the classical Venturi tube ... 16
6.4.2 Roughness of the upstream pipe ... 17

7 Flow calibration of Venturi tubes ... 17
7.1 General ... 17
7.2 Test facility ... 17
7.3 Meter installation ... 18
7.4 Design of the test programme ... 18
7.5 Reporting the calibration results ... 18
7.6 Uncertainty analysis of the calibration ... 18
7.6.1 General ... 18
7.6.2 Uncertainty of the test facility ... 18
7.6.3 Uncertainty of the Venturi tube ... 19

Annex A (informative) **Table of expansibility [expansion] factor ... 20**

Annex B (informative) **Classical Venturi tubes used outside the scope of ISO 5167-4 ... 21**

Annex C (informative) **Pressure loss in a classical Venturi tube ... 24**

Bibliography ... 26
