

ISO 5167-4:2022-06 (E)

Measurement of fluid flow by means of pressure differential devices inserted in circular cross-section conduits running full - Part 4: Venturi tubes

Contents		Page
	Foreword	v
	Introduction	vi
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Principles of the method of measurement and computation	2
5	Classical Venturi tubes	2
5.1	Field of application.....	2
5.1.1	General.....	2
5.1.2	Classical Venturi tube with an “as cast” convergent section.....	3
5.1.3	Classical Venturi tube with a machined convergent section.....	3
5.1.4	Classical Venturi tube with a fabricated convergent section.....	3
5.2	General shape.....	3
5.2.1	General.....	3
5.2.2	Entrance cylinder.....	3
5.2.3	Convergent section.....	4
5.2.4	Throat.....	4
5.2.5	Divergent section.....	5
5.2.6	Truncated Venturi tube.....	5
5.2.7	Roughness.....	5
5.2.8	Classical Venturi tube with an “as cast” convergent section.....	5
5.2.9	Classical Venturi tube with a machined convergent section.....	6
5.2.10	Classical Venturi tube with a fabricated convergent section.....	6
5.3	Material and manufacture.....	7
5.4	Pressure tappings.....	7
5.5	Discharge coefficient, C	8
5.5.1	Limits of use.....	8
5.5.2	Discharge coefficient of the classical Venturi tube with an “as cast” convergent section.....	8
5.5.3	Discharge coefficient of the classical Venturi tube with a machined convergent section.....	9
5.5.4	Discharge coefficient of the classical Venturi tube with a fabricated convergent section.....	9
5.6	Expansibility [expansion] factor, ϵ	9
5.7	Uncertainty of the discharge coefficient, C	9
5.7.1	Classical Venturi tube with an “as cast” convergent section.....	9
5.7.2	Classical Venturi tube with a machined convergent section.....	9
5.7.3	Classical Venturi tube with a fabricated convergent section.....	10
5.8	Uncertainty of the expansibility [expansion] factor, ϵ	10
5.9	Pressure loss.....	10
5.9.1	Definition of the pressure loss.....	10
5.9.2	Relative pressure loss.....	10
6	Installation requirements	11
6.1	General.....	11
6.2	Minimum upstream and downstream straight lengths for installation between various fittings and the Venturi tube.....	12
6.3	Flow conditioners.....	16
6.4	Additional specific installation requirements for classical Venturi tubes.....	16

6.4.1	Circularity and cylindricality of the pipe and alignment of the classical Venturi tube.....	16
6.4.2	Roughness of the upstream pipe.....	17
7	Flow calibration of Venturi tubes	17
7.1	General.....	17
7.2	Test facility.....	17
7.3	Meter installation.....	18
7.4	Design of the test programme	18
7.5	Reporting the calibration results	18
7.6	Uncertainty analysis of the calibration	18
7.6.1	General	18
7.6.2	Uncertainty of the test facility	18
7.6.3	Uncertainty of the Venturi tube.....	19
	Annex A (informative) Table of expansibility [expansion] factor	20
	Annex B (informative) Classical Venturi tubes used outside the scope of ISO 5167-4	21
	Annex C (informative) Pressure loss in a classical Venturi tube	24
