

ISO 5167-4:2022-06 (E)

Measurement of fluid flow by means of pressure differential devices inserted in circular cross-section conduits running full - Part 4: Venturi tubes

| Contents | | Page |
|-----------------|--|-------------|
| | Foreword | v |
| | Introduction | vi |
| 1 | Scope | 1 |
| 2 | Normative references | 1 |
| 3 | Terms and definitions | 2 |
| 4 | Principles of the method of measurement and computation | 2 |
| 5 | Classical Venturi tubes | 2 |
| 5.1 | Field of application..... | 2 |
| 5.1.1 | General..... | 2 |
| 5.1.2 | Classical Venturi tube with an “as cast” convergent section..... | 3 |
| 5.1.3 | Classical Venturi tube with a machined convergent section..... | 3 |
| 5.1.4 | Classical Venturi tube with a fabricated convergent section..... | 3 |
| 5.2 | General shape..... | 3 |
| 5.2.1 | General..... | 3 |
| 5.2.2 | Entrance cylinder..... | 3 |
| 5.2.3 | Convergent section..... | 4 |
| 5.2.4 | Throat..... | 4 |
| 5.2.5 | Divergent section..... | 5 |
| 5.2.6 | Truncated Venturi tube..... | 5 |
| 5.2.7 | Roughness..... | 5 |
| 5.2.8 | Classical Venturi tube with an “as cast” convergent section..... | 5 |
| 5.2.9 | Classical Venturi tube with a machined convergent section..... | 6 |
| 5.2.10 | Classical Venturi tube with a fabricated convergent section..... | 6 |
| 5.3 | Material and manufacture..... | 7 |
| 5.4 | Pressure tappings..... | 7 |
| 5.5 | Discharge coefficient, C | 8 |
| 5.5.1 | Limits of use..... | 8 |
| 5.5.2 | Discharge coefficient of the classical Venturi tube with an “as cast” convergent section..... | 8 |
| 5.5.3 | Discharge coefficient of the classical Venturi tube with a machined convergent section..... | 9 |
| 5.5.4 | Discharge coefficient of the classical Venturi tube with a fabricated convergent section..... | 9 |
| 5.6 | Expansibility [expansion] factor, ϵ | 9 |
| 5.7 | Uncertainty of the discharge coefficient, C | 9 |
| 5.7.1 | Classical Venturi tube with an “as cast” convergent section..... | 9 |
| 5.7.2 | Classical Venturi tube with a machined convergent section..... | 9 |
| 5.7.3 | Classical Venturi tube with a fabricated convergent section..... | 10 |
| 5.8 | Uncertainty of the expansibility [expansion] factor, ϵ | 10 |
| 5.9 | Pressure loss..... | 10 |
| 5.9.1 | Definition of the pressure loss..... | 10 |
| 5.9.2 | Relative pressure loss..... | 10 |
| 6 | Installation requirements | 11 |
| 6.1 | General..... | 11 |
| 6.2 | Minimum upstream and downstream straight lengths for installation between various fittings and the Venturi tube..... | 12 |
| 6.3 | Flow conditioners..... | 16 |
| 6.4 | Additional specific installation requirements for classical Venturi tubes..... | 16 |

| | | |
|----------|---|-----------|
| 6.4.1 | Circularity and cylindricality of the pipe and alignment of the classical Venturi tube..... | 16 |
| 6.4.2 | Roughness of the upstream pipe..... | 17 |
| 7 | Flow calibration of Venturi tubes | 17 |
| 7.1 | General..... | 17 |
| 7.2 | Test facility..... | 17 |
| 7.3 | Meter installation..... | 18 |
| 7.4 | Design of the test programme | 18 |
| 7.5 | Reporting the calibration results | 18 |
| 7.6 | Uncertainty analysis of the calibration | 18 |
| 7.6.1 | General | 18 |
| 7.6.2 | Uncertainty of the test facility | 18 |
| 7.6.3 | Uncertainty of the Venturi tube..... | 19 |
| | Annex A (informative) Table of expansibility [expansion] factor | 20 |
| | Annex B (informative) Classical Venturi tubes used outside the scope of ISO 5167-4 | 21 |
| | Annex C (informative) Pressure loss in a classical Venturi tube | 24 |
| | Bibliography | 26 |
