5 Calibration, adjustment and verification of an instrument .....	9
5.1 General .....	9
5.2 Methods for calibration, adjustment and verification .....	9
5.3 Instrument calibration procedure .....	10
5.3.1 Calibration by measurement standards .....	10
5.3.2 Handling of defects on material measures .....	10
5.3.3 Measurement procedures for calibration with measurement standards .....	10
5.3.4 Calibration conditions .....	10
6 Determination of the metrological characteristics of the instrument .....	11
6.1 General .....	11
6.2 Reporting of the measurement conditions .....	11
6.3 Handling of non-measured points .....	11
6.4 Handling of spurious data and outliers .....	11
6.5 Metrological characteristic: measurement noise, NM, and instrument noise, NI .....	11
6.5.1 General .....	11
6.5.2 Determination of measurement and instrument noise: application of filters or operators ..	12
6.5.3 Determination of measurement and instrument noise: material measures for instrument and measurement noise estimation .....	12
6.5.4 Determination of measurement and instrument noise: procedure for the determination of measurement noise .....	12
6.6 Determination of flatness deviation .....	16
6.6.1 General .....	16
6.6.2 Material measure for determination of flatness deviation .....	16
6.6.3 Procedure for determination of flatness deviation .....	16
6.6.4 Improvement of flatness deviation estimation .....	16
6.6.5 Application of filters and operators .....	17
6.6.6 Calibration of flatness deviation .....	17
6.7 Determination of the amplification coefficient z for the z-axis .....	17
6.7.1 General .....	17
6.7.2 Determination of the amplification coefficient z for the z-axis: material measures .....	17
6.7.3 Procedure for determination of amplification coefficient z for the instrument z-axis .....	18
6.7.4 Type PGR (profile-groove-rectangular): groove, straight (rectangular or trapezoidal) measurement areas .....	18
6.7.5 Other material measures for the instrument z-axis calibration .....	20

<b>6.7.6</b>	<b>Procedure for determination of amplification coefficient z for the instrument z-axis: range and distance of measurement positions for the calibration of the z-scale of the instrument .....</b>	<b>21</b>
<b>6.7.7</b>	<b>Range and distance of measurement position for the calibration of a reduced z-scale of the instrument .....</b>	<b>21</b>
