

ISO 1938-1:2026-05 (E)

Geometrical product specifications (GPS) - Dimensional measuring equipment - Part 1: Plain limit gauges of linear size

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
3.1	Limits	2
3.2	Gauge types	3
3.3	Characteristics and function of gauges	6
4	Abbreviated terms and symbols	7
5	Design characteristics for gauges	8
6	Metrological characteristics	9
6.1	General	9
6.2	Metrological characteristic relative to the type of limit gauge (GO gauge or NO GO gauge)	10
7	Maximum permissible limits (MPL) on metrological characteristics	14
7.1	General	14
7.2	Values for calculation of MPL for limit gauges for internal features of size	14
7.3	Values for calculation of MPL of limit gauges for external features of size	16
7.4	Values for calculation of MPL of limit gauges	18
8	Proving conformance with specification for limit gauges	21
9	Verification of dimensional specification of a workpiece with limit gauges	21
10	Marking	23
	Annex A (informative) General principles and application of limit gauging	24
	Annex B (informative) Description of the specific use of the various gauge types and the associated uncertainty	26
	Annex C (informative) Relationship to the GPS matrix model	29
	Bibliography	30
