ISO 14978:2006-07 (E)

Geometrical product specifications (GPS) - General concepts and requirements for GPS measuring equipment

Contents

Page

Foreword iv

Introduction v

1 Scope 1

2 Normative references 1

3 Terms and definitions 2

4 Abbreviations 12

5 Design characteristics 13
5.1 General 13
5.2 Indicating measuring equipment 14
5.3 Material measures 14

6 Metrological characteristics 15
6.1 General 15
6.2 Identification, definition and choice of metrological characteristics 16
6.3 Indicating measuring equipment -- identification of general metrological characteristics 17
6.4 Material measures -- Identification of general metrological characteristics 19

7 Types of presentation and types of specifications for characteristics 21
7.1 General 21
7.2 Presentation of characteristic curves -- Fixed and floating zero 21
7.3 Presentation of a characteristic -- Statistical 24
7.4 Specifications for single-value metrological characteristics 25
7.5 Specification for metrological characteristics defined in a range 25
7.6 Specification for metrological characteristics defined in a two- or three-dimensional range 29

8 Calibration of metrological characteristics 29
8.1 Manufacturer and supplier of measuring instruments 29
8.2 User of measuring instruments 29
8.3 Measurement uncertainty 29

9 Marking 30

Annex A (normative) General minimum requirements and guidance for clauses in GPS standards for specific measuring equipment 31

Annex B (informative) Data sheet for measuring equipment requirements 33

Annex C (normative) Relation to the GPS matrix model 35

Bibliography 37
