

ISO 14978:2006-07 (E)

Geometrical product specifications (GPS) - General concepts and requirements for GPS measuring equipment

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	Abbreviations	12
5	Design characteristics	13
5.1	General	13
5.2	Indicating measuring equipment	14
5.3	Material measures	14
6	Metrological characteristics	15
6.1	General	15
6.2	Identification, definition and choice of metrological characteristics	16
6.3	Indicating measuring equipment -- identification of general metrological characteristics ..	17
6.4	Material measures -- Identification of general metrological characteristics	19
7	Types of presentation and types of specifications for characteristics	21
7.1	General	21
7.2	Presentation of characteristic curves -- Fixed and floating zero	21
7.3	Presentation of a characteristic -- Statistical	24
7.4	Specifications for single-value metrological characteristics	25
7.5	Specification for metrological characteristics defined in a range	25
7.6	Specification for metrological characteristics defined in a two- or three-dimensional range	29
8	Calibration of metrological characteristics	29
8.1	Manufacturer and supplier of measuring instruments	29
8.2	User of measuring instruments	29
8.3	Measurement uncertainty	29
9	Marking	30
Annex A (normative)	General minimum requirements and guidance for clauses in GPS standards for specific measuring equipment	31
Annex B (informative)	Data sheet for measuring equipment requirements	33
Annex C (normative)	Relation to the GPS matrix model	35
Bibliography		37
