

ISO/TS 23165:2006-07 (E)

Geometrical product specifications (GPS) - Guidelines for the evaluation of coordinate measuring machine (CMM) test uncertainty

Contents		Page
Foreword		iv
Introduction		v
1	Scope	1
2	Normative references	1
3	Terms and definitions	2
4	General	2
5	Test probing error	3
6	Test of size	3
6.1	General	3
6.2	Analysis of the uncertainty contributors	4
6.3	Graphical representation of the test results	6
Annex A (normative) Background and more detailed information		8
Annex B (normative) Using an alternative material standard of size		20
Annex C (informative) Examples of uncertainty budgeting		21
Annex D (informative) Relation to the GPS matrix model		30
Bibliography		31
