DIN EN 17427:2022-08 (E)

Packaging - Requirements and test scheme for carrier bags suitable for treatment in well-managed home composting installations

Contents

Page

European foreword 4

Introduction 5

1 Scope 6

2 Normative references 7

3 Terms and definitions 8

4 Principle 11

5 General requirements 11
5.1 Assessment 11
5.1.1 General 11
5.1.2 Characterization 11
5.1.3 Biodegradation 12
5.1.4 Disintegration 12
5.1.5 Compost quality 12
5.1.6 Labelling 12
5.2 Equivalent form 12
5.3 Carrier bag consisting ofmultiple components 12
5.4 Materials of natural origin 12

6 Detailed requirements 12
6.1 General 12
6.2 Characterization 12
6.2.1 Control of constituents 12
6.2.2 Volatile solids 14
6.2.3 Identifying characteristics 14
6.3 Ultimate aerobic biodegradation 15
6.3.1 General requirements 15
6.3.2 Specific requirements 17
6.3.3 Test duration 17
6.3.4 Validity criteria 17
6.4 Disintegration 18
6.4.1 General 18
6.4.2 Weight evaluation method of disintegration/Requirements 18
6.4.3 Test duration 18
6.5 Effects on compost quality 18
6.5.1 Compost production 18
6.5.2 Determination of negative effect to terrestrial organisms 19
6.5.3 Requirements 21

7 Test report 22

Annex A (normative) Determination of ecotoxic effects to higher plants 23

A.1 General 23
A.2 Properties of the reference substrate 23
A.3 Preparation of samples 23

A.4 Selection of plant species 23
A.5 Performing the tests 24
A.6 Validity of the tests 24
A.7 Evaluation of the results 24

Annex B (normative) Determination of acute ecotoxic effects to earthworms 25

B.1 General 25
B.2 Selection of the reference substrate 25
B.3 Preparation of samples 25
B.4 Selection of earthworm species 25
B.5 Performing the tests 25
B.6 Validity of the tests 25
B.7 Evaluation of the results 25

Annex C (normative) Determination of chronic ecotoxic effects to earthworms 26

C.1 General 26
C.2 Selection of the reference substrate 26
C.3 Preparation of samples 26
C.4 Selection of earthworm species 26
C.5 Performing the tests 26
C.6 Validity of the tests 26
C.7 Evaluation of the results 27

Annex D (normative) Determination of nitrification activity of soil microorganisms 28

D.1 General 28
D.2 Selection of the reference substrate 28
D.3 Preparation of samples 28
D.4 Performing the tests 28
D.5 Validity of the tests 28
D.6 Evaluation of the results 28

Annex E (informative) Features of well-managed home composting 29

Annex F (informative) Information about home composting 31
