## Water quality - Guidance on analytical quality control for chemical and physicochemical water analysis

---

Contents	Page
Foreword .....	iv
1 Scope .....	1
2 Normative references .....	1
3 Terms and definitions .....	2
3.1 Terms related to measurement methods .....	2
3.2 Terms related to measurement results .....	3
3.3 Terms related to uncertainty .....	5
4 Performance characteristics of analytical systems .....	5
4.1 Introduction .....	5
4.2 Scope of the method .....	6
4.3 Calibration .....	6
4.4 Limit of detection, limit of quantification .....	10
4.5 Interferences and matrix effects .....	12
4.6 Accuracy (trueness and precision) and uncertainty of measurement .....	14
4.7 Robustness .....	14
4.8 Fitness for purpose .....	15
5 Choosing analytical systems .....	15
5.1 General considerations .....	15
5.2 Practical considerations .....	16
6 Intralaboratory quality control .....	16
6.1 General .....	16
6.2 Terms relating to within-laboratory quality control .....	17
6.3 Control of accuracy .....	17
6.4 Control of trueness .....	18
6.5 Control of precision .....	19
6.6 Principles of applying control charts .....	21
6.7 Conclusions .....	25
6.8 Control charts with fixed quality criterions (target control charts) .....	27
7 Quality control in sampling .....	27
8 Interlaboratory quality control .....	28
9 Quality control for lengthy analytical procedures or analysis undertaken infrequently or at an ad hoc basis .....	28
9.1 Quality control for lengthy analytical procedures .....	28
9.2 Analysis undertaken infrequently or on an ad hoc basis .....	29
Annex A (informative) Verification of the limit of detection and the limit of quantification .....	30
Annex B (informative) The nature and sources of analytical errors .....	32
Annex C (informative) Estimating the measurement uncertainty .....	35
Annex D (informative) Example for performing quality control for lengthy analytical procedures .....	37
Bibliography .....	38
