

ISO/TR 27912:2016-05 (E)

Carbon dioxide capture - Carbon dioxide capture systems, technologies and processes

Contents	Page
Foreword	vii
Introduction	viii
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Symbols and abbreviated terms	8
5 Carbon dioxide (CO₂) capture system	12
5.1 General	12
5.2 Classification of CO₂ capture systems	14
5.3 System boundary	16
6 Review and documentation	16
6.1 General	16
6.2 Separation processes	18
6.2.1 Separation with sorbents/solvents	18
6.2.2 Separation with membranes	21
6.2.3 Separation by cryogenics or flash evaporation	22
7 Post-combustion capture in the power industry	22
7.1 System boundary	22
7.1.1 Boundary with power plant or other process stream (cooling water, steam, flue gas, product CO₂)	22
7.1.2 Boundary of the PCC plant	25
7.1.3 Boundary with transport and storage of CO₂	25
7.2 Technologies, equipment and processes	25
7.2.1 Chemical absorption process based on (alkanol-) amines (amine process) (A)	25
7.2.2 Chilled ammonia process (CAP) (B)	26
7.2.3 Amino acid salts (AAS) process (C)	27
7.3 Carbon dioxide streams, flue gas streams and emissions, process and waste products	28
7.3.1 Flue Gas streams	28
7.3.2 Composition of carbon dioxide streams	32
7.3.3 Solvent streams, reclaiming waste products	34
7.3.4 Waste (process) water streams	35
7.3.5 Emission determination and calculation	36
7.3.6 Process by-products	37
7.4 Evaluation procedure for capture performance	37
7.4.1 Clarification of the evaluation basis	38
7.4.2 Basic performance	38
7.4.3 Utility consumption	40
7.4.4 Operability (operational requirements)	41
7.4.5 Economic evaluation index	42
7.5 Safety issues	43
7.5.1 Safety categories	43
7.5.2 Relevant equipment and manifestations	44
7.5.3 Chemical substances and their behaviours	46

7.5.4	Environmental Impact Assessment (EIA)	49
7.5.5	Preventive measures	49
7.6	Reliability issues	52
7.6.1	Need for reliability assessment	52
7.6.2	Operational reliability	53
7.6.3	Reliability evaluation methods	54
7.6.4	Parameters of reliability	54
7.7	Management system	57
7.7.1	Management system between capture plant and emission source	57
7.7.2	Operational management	58
7.7.3	Relationship with other areas for CCS standardization	59
7.8	Reference plants	59
8	Pre-combustion capture in power industry	60
8.1	General	60
8.2	System boundary	61
8.3	Technologies, equipment and processes	62
8.3.1	Establishment of CO₂ capture rate	62
8.3.2	CO₂ capture process	62
8.4	Carbon dioxide streams, gas streams and emissions, process and waste products	65
8.4.1	CO₂ streams	66
8.4.2	Synthetic gas streams	68
8.4.3	Waste products	69
8.5	Evaluation procedure for capture performance	69
8.5.1	Definition of greenhouse gas (GHG) capture rate	69
8.5.2	Evaluation procedure for capture performance[96]	70
8.6	Safety issues	73
8.7	Reliability issues	74
8.8	Management system	74
8.8.1	Management system between capture plant and emission source	74
8.8.2	Operational management	75
8.8.3	Relationship with other areas for CCS standardization	76
9	Oxyfuel combustion power plant with CO₂ capture	76
9.1	System boundary	77
9.2	Technology, processes and equipment	78
9.2.1	Boiler island and auxiliary equipment	78
9.2.2	Steam turbine island and generators	79
9.2.3	Air separation unit (ASU)	80
9.2.4	Flue gas processing units (environmental island)	86
9.2.5	Flue gas condenser (flue gas cooler)	89
9.2.6	CO₂ processing unit (CPU)	91
9.2.7	Balance of plant	110
9.3	Product CO₂, other major gas streams, emissions and waste products	111
9.3.1	Product CO₂	111
9.3.2	Other gas streams	114
9.3.3	Emissions and waste products from oxyfuel combustion power plant	118
9.4	Evaluation procedure for CO₂ capture performance	119
9.5	Safety issues	119
9.5.1	Safe operation of the ASU and handling of oxygen on site	120
9.5.2	Prevention procedure of known risks to fire and/or explosion in the boiler or mills should be revisited for oxyfuel combustion operation	121
9.5.3	Accidental release of CO₂, flue gases, or other inert gases including liquid gas products	121
9.5.4	Prevention of any low temperature corrosion that could compromise the structural integrity of equipment	121
10	Capture from cement production processes[176][177]	121
10.1	System boundary	122
10.2	Technologies, equipment and processes	123
10.2.1	Post-combustion method (PCC)	125
10.2.2	Oxy-combustion method	125

10.3	Carbon dioxide streams, gas streams and emissions, process and waste products	126
10.3.1	NOx	129
10.3.2	SOx	129
10.3.3	Dust	129
10.3.4	HCl (Hydrogen chloride)	130
10.4	Evaluation procedure for capture performance	130
10.5	Safety issues	130
10.6	Reliability issues	131
10.7	Management system	132
11	CO₂ Capture in the iron and steel industry	132
11.1	Overview -- Global steel production	132
11.2	Point sources of CO ₂ emissions within the iron and steel production	133
11.2.1	Calculation of CO ₂ emissions from the steel mill	133
11.2.2	Direct CO ₂ emissions in an integrated mill producing steel through the BF-BOF route ...	133
11.2.3	Overview of CO ₂ emissions from alternative steel making processes	136
11.3	CO ₂ reduction and CCS deployment strategy in the steel industry	138
11.4	Review of major CO ₂ breakthrough programmes worldwide	139
11.4.1	ULCOS programme	139
11.4.2	COURSE50 programme	140
11.4.3	POSCO/RIST programme	141
11.5	System boundary	141
11.6	Capture of CO ₂ from blast furnace gas	142
11.6.1	Development of chemical absorption technology under the COURSE50 programme	142
11.6.2	Development of chemical absorption technology under the POSCO/ RIST programme ...	144
11.6.3	Development of physical adsorption technology under COURSE50 programme	145
11.6.4	ULCOS BF -- Oxygen-blown BF with top gas recycle	146
11.6.5	Other commercial development	148
11.7	Specific energy consumption of CO ₂ captured	150
11.8	Gas streams	153
11.8.1	Conventional blast furnace gas (BFG)	153
11.8.2	BFG from an oxygen-blown BF with top gas recycle (ULCOS BF)	153
11.9	CO ₂ capture from alternative ironmaking process	154
11.9.1	Direct reduction ironmaking process	154
11.9.2	Smelting reduction ironmaking process	160
11.10	Evaluation procedures for capture processes	166
11.11	Reliability issues	166
11.12	Safety issues	166
12	Capture from industrial gas production processes	167
12.1	System boundary	168
12.1.1	Natural gas sweetening process	168
12.1.2	Ammonia production process	169
12.1.3	Hydrogen production process	169
12.2	Technologies, equipment and processes	171
12.3	Carbon dioxide streams, gas streams and emissions, process and waste products	172
12.3.1	Chemical absorption	172
12.3.2	Physical absorption process	173
12.3.3	Membrane separation	173
12.3.4	Evaluation procedure for capture performance	173
12.4	Safety issues	174
12.5	Reliability issues	175
12.6	Management system	175
12.6.1	Management system between capture plant and emission source	175
12.6.2	Operational management	177
12.6.3	Relationship with other areas for CCS standardization	177
13	Discussion on possible future direction	177
13.1	General	177
13.2	Possible area of standardization	178
13.3	Discussion	178

Annex A (informative) Chemical absorption processes	181
Annex B (informative) Examples of flue gas compositions	186
Annex C (informative) Physical absorption processes	190
Annex D (informative) CO₂ capture terms and definitions list	193
Bibliography	209
