ISO/TS 21231:2019 (E)

Water quality — Characterization of analytical methods — Guidelines for the selection of a representative matrix

Contents

Foreword

Introduction

1 Scope

2 Normative references

3 Terms and definitions

4 Principle

5 Influence parameters

5.1 Common parameters for all matrices
5.2 Water intended for consumption
5.3 Natural waters
5.4 Waste waters
5.5 Marine waters
5.6 Recreational waters

6 Selection of characteristic parameters of a matrix

6.1 General
6.2 All waters
6.3 Waters intended for consumption
6.4 Natural waters
6.5 Waste waters
6.6 Marine waters
6.7 Recreational waters

7 Available materials

7.1 General
7.2 Material obtained by reasonable dilution of a real matrix
7.3 Artificial material
7.4 Analyte-specific blank values in matrices

8 Report

Annex A (informative) Characterization of waters intended for human consumption and mineral waters

Annex B (informative) Examples of preparation of artificial matrices and representative characteristics

B.1 Overview
B.2 Equipment
B.3 Reagents
B.4 Marine waters
B.4.1 General
B.4.2 Stock solutions
B.4.2.1 Stock solution No. 1
B.4.2.2 Stock solution No. 2
B.4.2.3 Stock solution No. 3
B.4.3 Preparation
B.4.3.1 Artificial marine water[7], [10]
B.4.3.2 Heavy metal-enriched artificial marine water[11]
B.4.3.3 Artificial marine water as per Kester[15]

B.4.3.4 Controlled-salinity artificial marine waters as per Grasshoff[15], [16]
B.4.3.4.1 Artificial marine water as per Grasshoff — Formula 1
B.4.3.4.2 Artificial marine water as per Grasshoff — Formula 2
B.5 Waste waters
B.5.1 General
B.5.2 WWTP water[9]
B.5.3 Discharge water
B.5.3.1 Source of the formula
B.5.3.2 Preparation
B.5.4 Artificial effluent 1[12]
B.5.5 Artificial effluent 2[11]
B.5.6 Artificial effluent 3[13]
B.5.7 Typical values of the characteristic parameters of waste water formulae

Annex C (informative) Occurrence of chemical substances in waste water, by industrial activity sector

C.1 Sources
C.2 Industrial activities

Annex D (informative) Leachate

D.1 Definition
D.1.1 Land leachate
D.1.2 Preapred leachate
D.2 Preparation of leachate representative matrix
D.2.1 Land leachate
D.2.2 Prepared leachate
