## Carbon dioxide capture — Overview of carbon dioxide capture technologies in the cement industry

---

### Contents

	Foreword
	Introduction
1	Scope
2	Normative references
3	Terms and definitions
4	CO <sub>2</sub> and the cement industry
4.1	Cement manufacture
4.2	CO <sub>2</sub> emissions from the cement industry
4.2.1	Production process description
4.2.2	Process emissions from calcination
4.2.3	Combustion emissions
4.2.4	Emissions compared to other sectors
4.3	CO <sub>2</sub> purification after capture
4.4	Abatement technologies in general
5	Overview of CO <sub>2</sub> capture technologies
5.1	Absorption with amines
5.2	Absorption with chilled ammonia
5.3	Sorbent-based adsorption technologies
5.4	Oxy-fuel combustion technology
5.5	Pressure swing adsorption separation technology
5.6	Separation with membranes
5.7	Direct separation
5.8	Calcium looping
6	Overview and assessment
6.1	Assessment factors of CO <sub>2</sub> capture technologies
6.2	Case study of technological and economic evaluation of CO <sub>2</sub> capture technologies
6.3	Ability to retrofit existing cement plants with CO <sub>2</sub> capture technologies
7	Final considerations
