## Soil functions and related ecosystem services - Definitions, descriptions and conceptual framework

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1	Scope .....	1
2	Normative references .....	1
3	Terms and definitions .....	1
4	General consideration .....	4
5	Description of ecological soil functions .....	4
5.1	General .....	4
5.2	Water regulation, retention and release .....	4
5.3	Organic matter storage, transformation and recycling .....	4
5.4	Nutrient cycling .....	5
5.5	Contaminant retention, transformation and degradation .....	5
5.6	Gas exchanges with atmosphere .....	5
5.7	Habitat provision .....	6
5.8	Physical stability .....	6
6	Description of soil ecosystem services .....	8
6.1	General .....	8
6.2	Biomass production .....	8
6.3	Hydrological control (purification, supply, regulation) .....	8
6.4	Erosion control .....	8
6.5	Nutrient and element cycling .....	8
6.6	Climate regulation .....	8
6.7	Biodiversity maintenance and resilience .....	9
6.8	Pest, disease control, plant health promotion .....	9
6.9	Contaminant-related ecosystem services .....	9
6.10	Air quality regulation .....	9
7	Conceptual framework of ecosystems services provided by soils .....	9
Bibliography .....		11
