

ISO/TS 18671:2026-08 (E)

Test methodologies for assessing the compatibility of wet wipes and moist toilet tissue with the wastewater collection and treatment systems, and appropriate labelling

Contents	Page
Foreword	iv
Introduction	v
1 Scope	1
2 Normative references	1
3 Terms and definitions.....	1
4 Framework	3
4.1 Context	3
4.2 Domestic plumbing and drainline systems	4
4.2.1 Toilets	4
4.2.2 Drainlines	4
4.3 Wastewater transport systems	4
4.3.1 General	4
4.3.2 Sewers	4
4.3.3 Pumping stations	5
4.4 Wastewater treatment systems	5
4.4.1 General	5
4.4.2 Settling	5
4.5 Biodegradation and biodisintegration	5
4.6 On-site domestic wastewater systems	6
4.7 Environment	6
5 Testing methodologies	6
5.1 General	6
5.2 Domestic plumbing and drainline systems	7
5.2.1 General	7
5.2.2 Toilet clearance test	8
5.2.3 Drainlines	8
5.2.4 Household pump test	8
5.3 Wastewater transport networks	8
5.3.1 General	8
5.3.2 Disintegration testing methods	9
5.3.3 Disintegration testing method considerations	9
5.3.4 Municipal sewage pump test	10
5.4 Wastewater treatment systems	10
5.4.1 General	10
5.4.2 Settling	10
5.4.3 Biodegradation and biodisintegration tests	11
6 Labelling	12
6.1 General	12
6.2 When to apply labelling	12
6.3 Packaging	12
6.4 Location on the packaging	12
6.5 Geometric shape and colour	13
6.6 Size	13
6.7 Advisory text	13
Annex A (informative) Examples of labelling	14
Annex B (informative) Summary of current test methods	15
Bibliography	25
