## Water quality - Guidance for establishing the equivalency of results

---

<b>Contents</b>		<b>Page</b>
Foreword .....		iv
Introduction .....		v
1 Scope .....		1
2 Normative references .....		1
3 Terms and definitions .....		1
4 Overview of the different approaches .....		2
5 Amount of data .....		2
6 Data comparisons .....		3
7 Comparison of arithmetic means of two independently obtained sets of data .....		3
8 Comparison of population and sample arithmetic means .....		4
9 Analysis of variance .....		5
10 Determination of the equivalence of analytical results obtained from samples from different matrices .....		7
10.1 General .....		7
10.2 Determination of the equivalence of the analytical results of real samples using orthogonal regression .....		7
10.3 Evaluation according to the difference method .....		9
11 Reporting .....		10
Annex A (informative) Statistical tables .....		11
Annex B (informative) Example of a comparison of arithmetic means of two independently obtained sets of data .....		13
Annex C (informative) Example of a comparison of population and sample arithmetic means .....		15
Annex D (informative) Example of an analysis of variance .....		16
Annex E (informative) Examples of a comparison of results from samples of different matrices .....		18
Annex F (informative) Illustrative examples of graphic plots .....		24
Annex G (informative) Schematic diagrams .....		27
Bibliography .....		29
